

//--\\--\\-- Chains of Humanity [~] 03/19/2023 \\--\\--\\--

## Introduction /

In this document, I've transcribed an [audio log] that I recorded on [03/18/2023 0731] in which I talk about a concept related to the [money system], [fractional reserve lending], and [hive mentality].

|---|------|----------|---|
| 0 | MCCS | 00:00:00 | Audio log, [Saturday] [March 18th, 2023]<br>Michael Cook speaking... It's currently [07:31AM].<br><br>I'm... not entirely sure what I'm gonna talk about in this particular [audio recording], but I am gonna talk about the [concept] of [money], and the idea behind [fractional reserve lending], and...<br><br>The idea behind uh- like this [hive mentality] that people have regarding [money], specifically... |
| 1 | MCCS | 00:00:32 | And, how uh- [all of these things combined], they sort of like uh- they [commandeer] people's uh- [sensibilities], right...?<br><br>So I have [spoken] about this [concept] numerous times [before], and uh- It really is a [daunting task], because I'm not entirely certain [how to shape this narrative], further...   |
| 2 | MCCS | 00:00:58 | ...without uh- [causing people] to, uh- I don't know, feel [repulsed], by either [what I'm saying], or the [reality], or [both].<br><br>So, [take this into consideration], right...?<br><br>In the movie [The Matrix], starring [Keanu Reeves], [Lawrence Fishburne], and uh- I can't remember the girl's name, uh- [Trinity].<br><br>I think it's like, [Carrie Ann Moss], or somethin'...                          |
| 3 | MCCS | 00:01:34 | Well, anyway uh- in the movie, [The Matrix], uh- [Morpheus] asks [Neo], uh- whether he would like to take the [red pill] or the [blue pill].<br><br>Right...? And uh- I forget exactly which one is which, but uh-  |
| 4 | MCCS | 00:02:02 | I- I think the [red pill] is the one where he goes back in to [Never Never land], and then the [blue pill], if he takes that one, then he wakes up. And he sees   |

[how far down the rabbit hole goes] and everything...

It's been a while since I've seen the actual movie, but- the [notion] that I'm [alluding] to, is uh-

5     MCCS   00:02:24 It really is a [100% identical] uh- it's an [illustration] for how uh- the [concept of money controls people].

It [controls] their [actions]...?

It [controls] their [decision making process]...?

It [controls] what they [do]...?

Right...? Like, [I'm not impervious to this], either, like...

I- I just think that I have a [much higher resistance than most people], because I have [asked myself] a [number] of [questions] as to [why] people [make] the [decisions] that they [do]... in reference to uh- [money], specifically.

Right...?

6     MCCS   00:03:01 So... When I was (10) years old, [my father was murdered].  
He was a [cab driver] in [Albany], working for a company name [OK Cab],  
or OK Ta- excuse me, [OK Taxi].

And, uh- the office was located on uh- [Second Ave].  
I guess it used to be over on [Essex Street].

But um...

7     MCCS   00:03:31 I remember [my father] used to like, [bring me along with him] sometimes,  
when he would [do] his [job].

Right...?

And uh- [me] and [my father] weren't gettin' along in the months  
leading up to his death...

I'm not gonna [elaborate] on [that], [specifically] in [this recording],  
but what I [will] say, is this, right...? Um...

8     MCCS   00:03:58 [My father] may [not] have been [killed] over the [money] that he had in his [possession]...  
Right...?

And uh- it took me a really long time to even ask this question, like,  
is that the [main motivation] behind what happened...?

Because I know that [most people in society], they're gonna  
[say] that like, [money] is the [most motivating factor] for [anybody].

However, um...

[There are higher motivations than that].

And, uh- [money] is basically just a [token] that [allows people] to  
[transfer], um... ya know, their [tokens of appreciation], or, or whatever...?

9     MCCS   00:04:38 Um- there are a lot of things that are [enveloped within] the  
[concept] of uh- the [monetary system].

So for instance, like uh- [guilt] and [shame]...?

[Embarrassment]...?

Uhm, [pride]...?

Uh- [worthiness]...?

Uh... [intelligence]...?

[All] these things are like, [enveloped] within the [monetary system],  
believe it or not.

10    MCCS   00:05:06 Right...?  
And uh- ya know, um... if [people think about] what's [right] and [wrong]...

They have to figure out like, uh- at [what point] does something  
that [IS right], [become wrong]...

And the [same question] can be [applied] in the [reverse direction]-  
At [what point] is something wr- can [something wrong]-  
be [considered right]...?

11    MCCS   00:05:30 And so, the concept of [philosophy], defines [when] and [where] those- those  
                  uh things are [located].

But- [typically] in our [society], uh- people will uh- go along with other  
[people's personalities], or- they'll [trust somebody's personality], over  
like- the [facts].  
Or even in some cases, the [evidence].

12    MCCS   00:05:51 Right...?  
                  And so, back on uh [September 12th, 2022]... uh-  
                  former uh [Secretary of State], [Hillary Rodham Clinton],  
                  I believe she was the [Secretary of State]...

Uh, she was also like a [Senator] for [New York],  
and the former [First Lady]...

She had an interview with this lady on [CNN], right...?  
And uh- this lady on [CNN]'s like:  
[Lady]: Ya know, I know you've been like uh- [prejudged] and everything...  
                  Right...?

And it's like...

13    MCCS   00:06:25 Yeh, like, the- the [people in the news]...?  
                  They like to [dance around] the uh- the [usage] of the [word],  
                  [prejudge], or [prejudice]...?

But their [entire], like [liveliness], [solely depend on people having this],  
in [certain amounts].

So [prejudice] can be broken down into multi- [multiple different aspects],  
but [most people associate prejudice] with like uh- a [negative connotation].

14    MCCS   00:06:53 However, [prejudice] can also be applied in the [positive connotation], and  
                  uh- being able to describe what terms define what's in the [negative zone]  
                  and the [positive zone]...?

Um, it [requires a bit of explanation] that you don't really get, like when you  
watch the news...

Or, you're watching [anything] on [broadcast television]...

15    MCCS   00:07:16 Right...?

More often than not, you'll [learn more] from [watching things] on  
[YouTube], or [doing your own research] and going to like, [Wikipedia]...

Right...?  
And uh- I'll even throw in uh- [snopes.com]

Like, because, they do a [pretty decent job] of trying to [get it right].

It's [not a consistent case where they're right], but- ya know, it's  
[consistent enough], to where their [reputation] is still gonna get a  
thumbs up by, universally uh- practically uh, [universal acclaim].

16    MCCS   00:07:48 Right, and so, this [concept of money] uh- it [disillusions people] to the  
                  [degree] where... it causes people to [disable] their uh- their uh  
                  [natural tendency] to be like:

[People]: Oh, well what about ME...?

...when [somebody] gets [something] that [THEY didn't get].

17    MCCS   00:08:12 Well, [somebody else] gets [something] that [they didn't get], right...?  
                  So like uh- let me put this into a [context], right...?

Um- I went to [school] with a guy named [Chad Gregory].  
[Chad Gregory] is the owner of [Next Generation Roofing].

[Chad Gregory] and I were in the [same grade], we rode the [same bus], and uh- we went to the [same school], right...?

[I remember him from childhood], right...?

18    MCCS   00:08:42 Uh- at [no point whatsoever] did I think to myself, because I'm not like most people, like when he started to succeed with his company, "Well what about ME, or MY business or whatever...?"

Right, but most people DO think that.

Like "Well, what about ME...? Why didn't I succeed or whatever...?"

It really comes down to the fact that like, [Chad] was a pretty likeable guy, to basically [everybody].

19    MCCS   00:09:07 Right...?

Um- I haven't seen him nor talked to him in a while.

But- um, the [concept] that I'm [alluding] to, there, is like, [envy] and [jealousy].

Right, they're both- they're- they're [(2) sides] to the [same coin]. Right...?

Am I [jealous] or [envious] of [Chad]'s success...?

Well, I'm not [envious] or [jealous] of it, like- I think that he did well for himself, and a lot of people seem to [like his work].

But at the same time, like, I understand like, he's worked with [shady characters].

20    MCCS   00:09:42 I'm not gonna talk about that right now.  
What I am gonna say is this...

Right...?

The [death] of my [father], caused me to [repulse] the [idea] of [money] being the thing that [motivates me] to [do] what I [do], or [think] the [way] that I [think], but [most people] in our [society]...?

They revolve- the [entire thing] that [they] think about, or [what motivates them]...? Is, [dollar signs]. [Dollar signs].  
Is what causes-  
It's [what motivates most people].

21    MCCS   00:10:14 Right...?

But- ya know, like uh- after uh- [suffering] the [loss] of my [father] and everything, I really [spent a number of years] just kind of like, [distancing myself] from the [way] that [everybody else thinks].

And like, I've made [so many observations] that [most people] would [never pick up on], because- like, [they're controlled] by this [concept] of like, [money] and like, being [more important] than one another.

And like, uh- ya know, uh- [having things] to [show] for [their success] and everything, right...?

22    MCCS   00:10:50 So like, case in point.

Um, there's this video of like a couple of kids, well, they're not kids, they're like, adults. And they got like uh- I dunno, they have like uh- like, [jewelry on their teeth] or whatever...

And it's... [really stupid looking]...?

Right...? But- they're [rich].

They are [stupid rich].

I don't know how much [money] they have, but- ya know, [a lot of people in society]...? They [envy] them.

23    MCCS   00:11:21 Right...?

They think that like, what they do is [COOL]...?

And then like, that's why they're [rich] and everything...?

And like, they can literally just uh- ya know,  
[+] [take piles of cash],  
[+] [throw it in a dumpster], and  
[+] [light it on fire]...?

And they'll [still have plenty more], to [waste].

Right...?

24    MCCS   00:11:40 But like, uh- [most people in society]...?

If they see, like, [somebody] taking a [shitload of cash],  
and [throwing it in a dumpster], and [lighting it on fire]...?

[Most people] will [freak the fuck out].

They'll be like:

[People]: What are you doing [burning all that cash]...?!?  
          Oh my god~!

Right...?

But-

25    MCCS   00:12:00 Ya know, take a step back from [what causes that cash to be made],  
                    and then you [realize] that like, heh.

A lot of things are [wasted] and [destroyed], in order to [create] all  
of those [dollars]. But I mean, like, [further to that point], like, a  
lot of what backs- uh, our [money system], is [bullshit].

Which is why I spoke about [fractional reserve lending].

Right...?

[Fractional reserve lending] is an idea that like,  
our [monetary system] is [overprovisioned].

26    MCCS   00:12:27 Ya know, back in the old days, uh- people would, uh- uh- my friend  
                    [Eric] told me about all this, but like- the way he that he [defined it]  
                    was something that I was [already talking to him about], but he wasn't like,  
                    [paying attention] to the [words] that I was [saying]...

So like- he- he kept [telling me] that I was like an [idiot],  
to [describe it] the [way] that I was [describing it], or that like,  
I didn't [describe it] the [way] that [he understood it].

27    MCCS   00:12:51 But basically, it's like this.

If there is, like, somebody that owns a gar- a [bar of gold]...?  
And they wanna like, use it to like, trade for [goods] or [services] or  
whatever...?

They'll [take the bar of gold], and they'll [bring it] to the [blacksmith],  
right...? And then, the [blacksmith] will just [hang onto it], because,  
like, [the person] doesn't wanna [carry] the [gold] around, because of how  
[heavy] it is.

And, because of how [valuable] it is.

28    MCCS   00:13:17 Right...?  
                    The [blacksmith] is [tough]...

He can make [weapons] out of [metal]...?  
And he can basically tell people to, to [eat a dick], if need be...?

And that's the idea of uh- like keeping uh- [security].  
Ya know...?

[Security] involves like [weapons], and [tough guys].

29    MCCS   00:13:36 Not necessarily [smart guys]...?

But [tough guys] and [weapons].  
Ya know...?

Mind meaning though we're in the [modern age] now, where [security] has  
taken on a [totally different context], um...

But uh-

Anyway, uh- [suppose] that uh- somebody that uh- wants to [trade] like,  
some of the [gold] that they [gave] to the [blacksmith], uh- for like,  
I dunno, like a [horse and carriage] or something...

30    MCCS   00:14:05   Um- now, [compound that] by like uh- [hundreds] or [thousands] of [people]  
                          in a [village], they all have like, a [piece] of that- gar- [bar of gold]...?

That they [own]...?  
So they can [trade it around], and stuff...?  
And like, what you'll find out, is basically, um...

The gold- the blacksmith got to a point where like:  
[Blacksmith]: Alright, how about I just like, [issue] a [note]...  
                  ...for that [piece] of [gold]...  
                  Because, if- not all of these people are gonna come back, and  
                  [take the gold out at the same time], or whatever...?  
                  In order to [trade it around]...?

31    MCCS   00:14:40   Cause basically what would happen is like, somebody would [take the gold],  
                          and then they'd tran- they'd- they'd [give it to the other person],  
                          and then the [other person] would give the- the [goods] or [service] or  
                          whatever, back...?

And then they would take- the [person] would [take the gold],  
and [bring it back] to the [blacksmith].

32    MCCS   00:14:54   So like, the person that [originally] had the gold, would keep it with the  
                          [blacksmith], they'd take it out, from the [blacksmith], and then they would  
                          [go trade the gold for the thing], and then the [other person] would [come back]  
                          with that [same bar of gold], and then [holy shit], there it is.

33    MCCS   00:15:06   So, the [blacksmith] caught onto this, and uh- started [overprovisioning-] excuse  
                          me, [overprovisioning] the uh- amount of gold, that could be [provisioned].

It's basically [bullshit].

That's what I mean, is the- that's what [overprovisioning] and  
[fractional reserve lending] is, is- it's [bullshit].

The stuff that [backs money]...?  
Is just, like, [inflated like a balloon].

34    MCCS   00:15:29   Ya know, you take the [original balloon], right...?  
                          And then you like, blow [hot air] into it, which is basically the  
                          same thing as [bullshit], [hot air] and [bullshit]...

And then you [blow it into the balloon], and then the [balloon] it-  
it [takes up a lot more volume]... because it [expanded].

It [expanded].

35    MCCS   00:15:50   And like, uh- once you like, try to take the [balloon back]...?

Like, [somebody owns that entire balloon], but- it's been [provisioned]  
to a [whole bunch of other people] by the [blacksmith], uh- then you  
[pop it], and then all that [hot air] goes to [waste].

So like, that's the idea of what our [economy] is [backed by].  
A lot of fuckin' [hot air].

Right...?  
So...

Thinking about how uh- this applies to... like uh- [my father] being  
[killed] when I was [(10) years old]...?

Uhm, I think that there were [other motivating factors] for [my father] being [killed], and... that [those motivating factors] had [very little] to do with [money].

36    MCCS   00:16:39 It had more to do with the [fear of death], by [somebody else].  
Or, I dunno. [I could be wrong] about some of these uh- uh-  
[suspicions] of mine, [I could be wrong]...

And that is something that the police often, uh- [fail] to [say out loud].  
Right...?

They hate to say this [out loud], like:  
[Police]: [I could be wrong] about this...

Because then people would be like:  
[People]: Well, then you ARE wrong...

37    MCCS   00:17:07 Right...?  
And uh-

It comes down to like, uh- when [people know their rights]...?

Uh- it's not unlike uh- the [hot air balloon]...?  
Or, the- the [balloon] with the [hot air] in it...?

Right, the [police] will [come around]...?

They'll [assume] that [somebody] doesn't [know] their [rights]...?  
And so like, their [power] is basically [an inflated balloon]...?

Right...?  
And then you say like, uh-  
[You]: Nah, look [I know what my rights are],  
and basically, you're [not obeying protocol]...?

Right, and the police- sometimes the [police] will [say] uh:  
[Cop]: You're [correct] about like uh- what you know...  
Et cetera and so forth...  
But, I'm still gonna, ya know, just uh- just  
[push ya outta the way here]...?  
Just cause I have to...  
You know...?  
[Standard operating procedure], is to just [ignore]  
your [rights], and then just [do whatever]...?

38    MCCS   00:17:51 Right...?

That's what happened, like, with me and this guy from SCSO,  
[K. Rossi]... back on, [February 26th, 2023] at the [Market 32]  
in [Clifton Park], right...?

I told him...

39    MCCS   00:18:08 Uh- that uh- ya know, I'm not gonna cover the whole concept at  
length here, but uh- what I am gonna say is this... right...?

[Being intelligent] does [not] equate to [becoming rich] or [successful].  
In some cases, [being intelligent] causes [people] that had [mommy] and  
[daddy], [hand down their riches] to their, [ignorant children], to give  
them [more control].

So if you like, [embarrass them] or [humiliate them], they will use [mommy]  
and [daddy]'s [money vault of doom]...

...to be able to [force] their [will] upon [other people].

And that is what the [police] tend to- tend to [take orders from].

40    MCCS   00:18:56 So like, if you ARE [intelligent enough] to like, [tell] the  
[police officers] that aren't doing their jobs correctly, that:  
[You]: You're doin' your jobs [incorrectly]...

...what they'll do is:

[Cop]: I [can't be wrong], cause you know...  
somebody's [thrown me] a [stack] of [cash],  
or [thrown me] an [order]...  
and I [can't disobey that order]...  
[even if it is wrong], or [illegal] for [me] to [do] this...  
so, I [have to do this].

41    MCCS   00:19:19 And then so like, [that] is what [causes] so many [problems] in our  
                  [society]. Right...?

I'm not gonna [go around] and like, uh- try to like, [blast] individual  
uh- [police officers] over, and over, and over again, [UNLESS]...

Like, they [repeat] this [behavior].

By making some of these [audio recordings], I can uh- [detail an account]  
for [things] that have [happened to me] in [my life], because I know that  
like, [no matter how many recordings I make] of the [police], and- uh-  
sounding like...

42    MCCS   00:19:46 They [don't understand], [how] to [do] their [job] as well as [I do] in  
                  [many cases], right...? What- the problem is that like, [most other people],  
                  they'll think that I'm either [bullshitting them], or they'll say:

[People]: Yeah but [you're not a police officer],  
          so, [you can't possibly be correct about any of that]...

43    MCCS   00:20:05 Some people [WILL] have this [mentality].  
                  Right...?

It's because, like, this uh- idea of uh- [money], it [causes people] to  
[drop their guard], and to think that like, [you need to have more money]  
in order to be [more important].

Uh- sure.

Ok. (*No, you don't.*)

44    MCCS   00:20:23 But you know, further to that point, like, our [government] like,  
                  [encourages] this [mentality], and you know, [many of the people] in the  
                  [press] or the [news agencies]...?

And [many corporations]...?

They [encourage] this [behavior], too.

Which is [problematic], because then it [causes] this uh- this uhm,  
[conflict of interest].

Right...?

45    MCCS   00:20:50 So, the [interest] is, that [everybody] wants to keep the [hot air]  
                  inside the [balloon].

No- they don't-

They wanna [prevent anybody] from [poppin' that balloon] open.

Ya know, not unlike how like a [cell] when it divides, like uh- when [cells]  
are [reproducing], they [divide] right down the middle and stuff, right...?

46    MCCS   00:21:08 Well, uh- that's what this [whole system] is [attempting] to do, is to  
                  [prevent] the [cell] from [dividing].

Or, from [collapsing], I should say... right?

So, um, the [entire world] would [devolve into chaos] if the  
[monetary system] did fail...

However, uh- there doesn't seem to be [enough effort] on uh- like uh-  
[going around] and [popping people's balloons]...

(*Like when the DoD uses its budget to spend (1400) dollars on (32) dollar parts*)

47    MCCS   00:21:34 Right...?

Or like, what'll happen is like, people will get like uh-  
they'll try to get like, their house or their [property evaluated]...?

Right...?

And then when they do, they'll find out that like, hey, the house...?

Nah, I was just thinkin' about this earlier, actually, like...

48       MCCS 00:21:53 And people will uh- go and buy like a (400,000) dollar house or somethin',  
                                right...?

And they'll be like:

[Somebody]: Wow, wow, look at my (400,000) dollar house.

Wow, it's such a cool house.

**Wow .**

And then, they'll tell all their friends...?

And they'll have like a [house warming party], or like a [christening party], or whatever...?

Right...?

And then like...

49       MCCS 00:22:14 Now [they're all there], they're in the [brand new (400,000) dollar house],  
                    right...?

And then, all of a sudden...?

[Bruce Tanski] builds a [(600,000) dollar house] across the street, and then the neighbors are like:

[Neighbors] Hey, hey, look at our brand new [(600,000) dollar house]~!

And then like, the people that bought the [(400,000) dollar house], they're like:

[400K]: Yeah, you're- you- you might have a c- a house that's worth like [(600,000) dollars], but- ya know, it [looks stupid] compared to my [(400,000) dollar] house...

And then the people with the [(600,000) dollar house] will be like:

[600K]: Yeh, uhm, nah nah, it's just your opinion that the s- our house, looks, stupid, compared to yours.

Ya know, your house, it- it looks [cheaper].

50 MCCS 00:22:53 And then they'll be like:

[400K]: Well it's just your opinion that my house looks [cheaper] than your...  
uh- lame-looking house.

Right...?

And then so like, people will [keep these things inside], right...?

Not realizing that like there's [very little], [visual difference] between the [(400,000) dollar house], and the [(600,000) dollar house].

51       MCCS   00:23:12 Yeah, one of em might have like an [indoor pool] or something, and like, I dunno.  
                          Like, I dunno.

It is...

It might have like a [couple extra bedrooms], and it might have like a [third bay] in the garage or something [lame] like that. And they'll be like that's the [(600,000) dollar house] versus the [(400,000) dollar house]. Right...?

52 MCCS 00:23:34 So like- what I can say for certain, is that like [most houses]...?

Uh- the [raw materials] to build, like a (400,000) or (600,000) dollar house...?

It's like, [(20,000) dollars].

For the [raw materials].

If not, [less].

A lot of it goes into the [labor], but it- also, a lot of it is uh- like uh- the [inspections], and like making sure the [engineering] and [blueprints] are on par, or snuff or whatever...?

And that like, people aren't makin' [mistakes]...?  
And that like, they have to [go back] and like [level things]...?  
And make sure everything's like, [measured correctly]...?  
And that it fits [according to plan], and it fits like, somebody's like- uh...

53    MCCS   00:24:19 I dunno. It- it fits every... [box] or [requirement] that is [expected] of it...?  
And then uh- once all of that is said and done...?

Right...?  
Then they can [start bragging] about how much their house costs,  
or what they could [sell it], for.

54    MCCS   00:24:37 Ya know, [houses] typically uh- when they're [resold],  
they [maintain their value], where like if you [buy] a [car],  
most cars [lose value], unless of course you [buy] like a  
really [well-built car]...

Or, a car that like, has been bought from a [reputable company] like-

Ya know, if you buy like a [Chevy Malibu, 2023]- I dunno if they make the  
[Malibu] anymore, but- you buy a [Chevy Malibu 2023], right...?

As soon as- for like, I dunno, [(30) grand]...?  
As soon as you drive it off of the lot...?

It loses like [(5) grand] in value...

55    MCCS   00:25:20 So even if you drive it [right off the lot], and you drive it [right back]...?  
You're only gonna get like [(25,000) dollars] back outta that [(30) grand].

Right...?  
But- let's say you buy a [Lamborghini].

As soon as you drive that [Lamborghini] off of the lot...?  
Uh- it still has, it's [pretty close] to the [same value].

Why is that the case...?

Well it's because, [a lot of cars are made to break down],  
they're [engineered] to [break down], so if you [spend more money]  
on a [vehicle], they will [engineer it better].

But- if you spend [less money] on a [vehicle]...?  
They will give you a [box of bolts and shit].

Loosely connected...?  
And every single bump and, and crack in the road is gonna cause those  
[bolts] and [lags] to start to like, ya know, like uh- [loosen up].

Oh boy.

56    MCCS   00:26:17 Yeah, so like, these are the things that uh- go into like [keeping value].

It- it, and uh- ya know, like uh- this [coffee shop] that I was going to  
for a while, they have like a [bunch of paintings there], right...?

And uh- the [paintings] all have like an [estimated value].  
You wanna [buy] this [painting]...?

Here's the [author] of the [painting]...?  
Here's how much the [painting costs]...?  
And uh- ya know...?

The [paintings] aren't [bad].  
But- those [paintings] are prolly gonna stick there- [stay there]  
for a while.

Mainly because, like, it's not the [proper setting] to [sell art].

57    MCCS   00:26:53 Though, I might be like uh- [I might not be correct about that], maybe  
some time- at- at some point in time, someone will come along, and they'll  
be like:  
[Someone]: I'd like to [buy] this [painting] right here...

And then the [coffee shop] will be like:  
[Shop] : Really...?

And they'll be like:  
[Someone] : Yeh yeh yeh, [I wanna buy the painting].  
[I wanna buy the painting].

58 MCCS 00:27:10 And then uh- they [buy] the [painting], and then they like- they [brag] about it.  
They're like:  
[Someone] : Look at this, [awesome painting] that I got at the [coffee shop].  
You know, it's amazing...

And then like, people'll be like:  
[People] : Wow.  
That's a pretty cool painting.  
[Someone] : It is, it is a cool painting.

Because [somebody] put [a lot of time and effort] into [making] that  
[painting].

And, what I can say, [further to that point], is that [somebody] put  
more [time] and [effort] into that [painting], than some of these [cars]  
that like, [GM] makes.

Right...?

59 MCCS 00:27:41 And uh- heh. Like, they got to a point where like they just [slowly], make  
the cars, like have these [design flaws] that [cost a lot of money] or [time]  
to [fix]...? Or [both]...?

And then uh- ya know, the same thing goes with the [houses].  
Though, I think the [houses] tend to [last a lot longer], uh- [in general].

[It's not a consistent case].  
[Modular homes] and even like, [mobile homes], those tend to [degrade] pretty  
quickly even if they are [brand new]... right, and uh-

60 MCCS 00:28:15 That's mainly because uh- ya know, the [foundation] does tend to matter.  
But also, the [materials].

Uhm, the idea behind like, uh- like- a [layer of roofing] is that it'll  
[last a generation], right...?

So I think- I don't think, [Chad] was taking a page from [Star Trek],  
when he decided to name his company [Next Generation Roofing].

Nah, I think what he was doing, was trying to make it- make his- the  
name of his company be the [sales point].

[Chad]: You know what...?  
When you get a [roofing job] from [US]...?  
It's gonna last until the [next generation].  
That's why it's [Next Generation Roofing].

61 MCCS 00:28:57 Right...? And uh- it's such a [simple idea], to like,  
make a [sales point] about the [name of the business].

That uh- it- it- really, it's like uh- a no- practically a [no brainer].

But- ya know, I wanna take away from uh- like uh- a lot of the points  
that I- I wanna [walk back], from many of the points that I made, and talk  
[specifically] about how uh- it- it- regardless of the facts...?

62 MCCS 00:29:24 Like, everybody in society...?

They do this uh- this thing where, [every decision] that they [make],  
is meant to like, [put more money] in their [pocket] somehow, rather  
than to like, uh- [increase] the [value] of the [things] that they're  
[doing].

63 MCCS 00:29:43 Right...?

A lot of people- uh- they [struggle] to [identify] with, what is it that gives- excuse me, they [struggle] to [identify] with uh- like, the [reason] why the [paintings], [why] they [get the value] that they [do], or why, a [house] gets the [value] that it [does].

Or why, uh- a [vehicle] will get the [value] that it does.  
Right...?

64    M CCS    00:30:05    Uhm, each of these things that I've rattled off, their [value] is [determined] through [some means].

Right...?

Wi- with a house...?

Uh, you'll get someone who comes, and they give the house an [appraisal].

And [it costs money] to have them [do] this, they need to [spend] a [fair amount of time] being able to [do] it... and uh- typically, if you invite a [house appraisal]- uh- [appraiser] to a house that's like, not [picture perfect], or whatever...?

65    M CCS    00:30:34    They won't even like, [continue] to [appraise] the [house] or [nothin]'.  
Nah, they'll just see it, and they'll be like:  
[Appraiser]: This house is [shit].  
                  [I'm outta here].

So, if it's not [picture perfect], they will literally...  
they won't [say] those [words], but their [actions will] say it.

They'll be like:

[Appraiser]: Oh, uh- ya know, uh- I think that uh- I uh- I think that...

I dunno, I really, I'm not gonna try to like, come up with  
something on their behalf or whatever, but- uhm...

66    M CCS    00:31:09    [People in society], they do this, where uh- they [judge] each other based  
on people's [possessions], rather than like uh- like [how intelligent they are],  
or what they have to offer...?

[People judge each other based on their possessions].  
It's- it's [plain and simple], that is what [a lot of people] in our [society]  
do. So like, if uh- [if somebody owns property]...?

67    M CCS    00:31:34    And they have a [house] or a [bunch of stuff] on the [property], and it's all  
[shit], but [they still own the property]...?

Ya know, and the person could be really, like, [not very intelligent at all]...?

But like, then somebody who's like, [really smart]...?

Who like uh- had their [father murdered] when they were a [kid], who like,  
continues to [make a bunch of content], where he [sounds very sophisticated],  
and he's trying to [educate other people]...

Well, [for whatever reason], our [society] will [still give preference] to  
the [idiot] who [owns a whole bunch of property], over the [person] that sounds  
[sophisticated], and is [attempting] to [teach people everything], about like,  
how [flawed] our [society is]...

And the [reason] that they [do] it, is because...  
...this is what the [schools teach people] to [do].

68    M CCS    00:32:26    Right...?

So when [people pay their taxes], they're [paying] the [schools] to [educate]  
their [children] to [judge each other] based on their [possessions]. Ya know,  
if somebody doesn't [possess anything]...?

Then that means that they're a [loser].

That is what the [schools teach the children].  
[In our country].  
[And in other countries].

It's [what our society teaches people].  
If [somebody] doesn't have [possessions]...?  
Then [they're] a [scumbag].

69    MCCS   00:32:59 Right...?

But- at [some point] in the [future], the [concept] behind [money], is gonna  
be replaced by, a [concept] that they had [back in 1776].

Like, [bartering]...  
[Bartering] and [sharing stuff].

Ya know, uh- [gluttony] is a [very serious problem].  
[Gluttony] and uh- [riches].

I don't wanna say that like, [everybody] that is a [rich person],  
or [wealthy], that uh- they have a [negative connotation] of  
[gluttony], going on...

70    MCCS   00:33:40 However, [it is one of the seven deadly sins].

I'm not gonna really uh- talk about the [seven deadly sins] so much,  
because, uhm- really [what they all devolve into], is like these  
[ideas] of like [envy], [jealousy], uhm, [deception]- uh, like  
[murder], and things like that...

Like, [basic human instincts].  
Where like, [you don't wanna be killed]...?  
Then, [so don't kill anybody else].

[The golden rule], [treat other people as you would like to be treated].

However, uh- [some people see that as a one-way street].

71    MCCS   00:34:14 Right...?

As soon as they have like a [title]...?

They [forget] about like, the idea behind like, uh- [treating people] as  
[equals] and [treating them with respect]...? No matter whether they have  
[possessions] or not...?

Or, no matter whether they're an [idiot] or not...  
Right...?

So, um, [often times] what'll happen is uh- people will just [go along]  
with the [whole show], because like, [some people] have [something] to  
[show] for like, what they've [worked for]...?

And like, they didn't need to be like [super duper intelligent] to [earn]  
like all the things that they [earned] in [their life]...? But- ya know,  
what they [earned] required a [certain amount] of [time] for them to [earn] those  
things, right...?

And uh...

72    MCCS   00:35:04 There are so many [scams] and [systems] in play, that [cause people] to not  
even [realize] that they've been [fooled], in [virtually every instance]  
where uh- ya know someone's [signing their life away].

Typically this has a lot to do with uh- like, I dunno, [mortgages].  
Or uh- [car payments].  
Or [car loans].  
Or [student loans].  
Right...?

73    MCCS   00:35:28 So, um, president [Joe Biden] thinks that it would be a [good idea] to  
[eliminate student debt]. And [I agree].

But- do you know who [doesn't] think it's a [good idea] to  
[eliminate student debt]...?

Uh- the [banks] that like, [issued the debt].  
To all the [people] that [took out student loans] and stuff.

The reason being, is it gives them [ability] to uh- [earn] uh- [interest] on the [principle balance].

74    MCCS   00:36:01 Right...?

So like, they have all these [systems] set up to where like uh- most- [a lot of people] that [go to school]...?

They wind up uh- [getting a job].

But that's not a [consistent case], many times, [people will go to school] and they [won't get a job] that like furthers their, uh- I dunno, uh- furthers their, [career] or whatever.

75    MCCS   00:36:33 Right...?

And uh- ya know, there's [something at play here], where a [lot] of [people] are [getting bamboozled], and it [allows] like, [certain people] to become [very successful], and a lot of [other people] to be [shafted]...?

And uh- what you're left with, is that like, our entire like, [system] has a [number] of [illusions] at [play], where... like- [some people] that are [rich] or [powerful] or [wealthy], they want like, [obedient servants] to be, uh [paid for their hard work].

They [don't] wanna [pay people] that are like [willing to compete], with uh [their business model], or their [source of revenue], or their [source of power]...?

76    MCCS   00:37:30 Like, if I go around and I [expose] a whole bunch of things like, uh [Joe Manchin]. Li- or uh- P- [Paul] or [Joe], I can't remember his first name, it's either [Paul] or [Joe].

Uh- he's like:

[Manchin]: I don't want the [student loan] thing, at all...

...the [student loan forgiveness package of doom].

Nah, I'm gonna- I'm gonna work [really hard] to [prevent that] from [making it in].

And it [doesn't matter] what the [number] is...?

I'm just gonna continue to [go] in [front] of the [cameras], and say that like, uh- [the number wasn't agreeable].

77    MCCS   00:38:05 Mainly because, um, there are a number of [lobbyists] or whatever they call the people that like [pay] the [people] in the [government] that [run] for [office]...?

Like, to [shut the hell up], and [vote] for [their agenda]...?

Right...?

So, [a lot of the people] in the [government], they're like a [puppet].

They're there, because like, [some rich people put them into that office], because, [they're gonna wind up doing their bidding].

78    MCCS   00:38:31 Right...?

So, [this isn't a consistent case], but it's [consistent enough] to where you can see- like there- w- whether you know [who's involved] in [what]...?

You can sort of like, uh- [aggregate] like, ok...

If uh, there's an [investor] out there, or [some rich billionaire] that [doesn't like the idea] of [student loan forgiveness]...?

And uh- [Joe Manchin] [doesn't like the idea] of [student loan forgiveness]...?

That like, uh- maybe uh- it's worth [researching] whether or not that [rich person] like, had anything to do with [Joe Manchin] getting into office, and uh- whether they have any [communications] with one another.

79    MCCS   00:39:13 So, these are the sort of things you might be able to [see] or [aggregate] at a comp- like a place like the [National Security Agency], or like [Verizon], or like any sort of [telecommunications company].

80    TXT    00:39:13 =====

Like, Facebook, Twitter, Microsoft, Verizon, Charter, AT&T, T-Mobile, etc.

- =====
- 81    MCCS   00:39:24 Right...?  
          So like, if uh- it comes down to like, [Joe Manchin] and [some rich billionaire]  
          keeping a [secret] or whatever, then they have to make sure that a [whole bunch]  
          of [people], in the [law enforcement system] and the [justice system], like,  
          they're all [paid their salaries], right...?  
  
          In order to like,uh- [perpetuate] this idea of uh- like, ya know [everything]  
          that I've [described] so far, ya know, [should very clearly], like [describe]  
          or [outline], like uh- [how devious some people are] in our uh- [country]  
          and [economy], right...?
- 82    MCCS   00:40:05 So... Now, I gotta uh- like uh- [unwind] this like a- a [fair amount], because  
          [I don't think that everybody, uh- with a lot of money does this]...  
  
          They might do [certain things] to a [certain extent], but I really don't think  
          that they all like, [violate people's rights], or they like,  
          [manipulate the system] or uh- the [politics], politi- [politics] all that much.  
  
          Right...?  
          They might like, [make an appearance] every once in a while, they might  
          say somethin', like [Larry Elliston]. I think that's his name...  
  
          The guy uh- the [CEO] of [Oracle], [Larry Ellison].
- 83    MCCS   00:40:47 Like, uh- [he's not the type of dude] that I think, he's goin' around,  
          doin' the shit that I just described.  
  
          Ya know, he- he- uh- he did well for himself with [Oracle], and [Oracle]  
          does [a lot of cool stuff]. And uh- they basically did a lot- they have a  
          lot of [overlapping], uh- [roles] with uh- [Microsoft]...  
  
          Right...?  
          And uh-
- 84    MCCS   00:41:13 Ya know, [Oracle] is [nothing to joke about].  
  
          They're uh- they're a [big company], and I find it [really hard to believe],  
          that uh- a guy like [Larry Ellison], would go around, like paying people  
          to like uh- ya know, [say no] to the [student loan forgiveness] thing.
- 85    MCCS   00:41:33 However, uhm, [there are a lot of people] that could never, ever, ever, come  
          close to like the success of [Microsoft] or [Oracle], that like, they have like  
          [thousands of friends] that like, are [friends] with [governors] all around the  
          [country] in [each state]...  
  
          And like, [they're sort of people] that would like, be cool with uh- the idea of  
          uh- [all (50) states] making [parts] for the [F-35]...
- 86    MCCS   00:42:01 Right...?  
          Sort of like, uh- [somebody suckin' on somebody's teat].  
  
          That's- that's- that's the [idea] behind [money], is that [somebody] has to  
          [suck on SOMEBODY's fuckin' teat] somewhere...  
  
          Right...?  
  
          And, uh- [I'm not against the idea of money], what I'm [against] is like,  
          how like, the [idea] of [money] causes [certain people] to [think of like]...  
  
          ...[stupid fuckin' shit] to [stay rich], or to [get rich], and [screw over] as  
          many [people] as they can...  
  
          ...as long as they do it without them [knowing] that they're [screwing them over]...  
  
          ...or if they [DO] know it, like uh- they have to like, they have to [sign] the  
          [dotted line], and like uh- [hit the checkbox], or whatever.
- 87    MCCS   00:42:42 Ya know, it's like:

[Somebody]: Initial here.  
Initial there...  
Initial there...  
And then read all the fine-  
Do- Ah, you don't wanna read all the [fine print].  
Don't rea- eh.  
I mean, if you wanna read the [fine print]...?  
Go ahead, read the [fine print].  
But I mean, like, you want that fuckin' [nice car] right there,  
or you want that [nice house]...?  
Right...?  
Yeh yeh yeh, alright.  
Well, read the-  
Eh.  
You don't need to read the [fine print] then, ya know...?  
You're gettin' what you want~!

Right...?  
And [as soon as that person gets what they want]...?

They don't realize that like, they're taking on the [responsibility] of like,  
turning- like- [their foreseeable future]...

88    MCCS   00:43:20 ...is [paying off the car payments] or the [house payments] or [mortgage]...

And then like, all of the [unexpected things] that [happen] in the [future]...?  
Will [likely] cause them to like, uhm, [derail].

There's [a lot of things that happen in life] that are [unexpected], right...?  
So, this happens to [most people] and it's why [a lot of things are risky].

There's [no way] to [guarantee] really anything, that [involves some level]  
of [risk]... Right...?

This is something that [Edward Snowden] talks about, with [John Oliver].

[Snowden]: The only time that you're like, [eliminating risk], is when  
you're [in prison].

89    MCCS   00:43:56 But even that, [that's not even true], because you could be [shanked], by  
[somebody in the prison].

But- um, ya know, the- the idea that I'm [alluding] to, is [specifically],  
uhm, I wanna sk- [walk back] to the conv- the [point] that I just made, again,  
but I lost it.

Uh- how like uh- so, [people] will [insure], like uh- the [student loan]  
company, and it wi- it will basically- they- [the companies] and the [people]  
that [place their bets], they [place bets], right...?

90    MCCS   00:44:39 So like, [they know] that [the odds are], that [most people] that [get] a  
[student loan], they're not gonna- like, be able to [do] a [whole lot] with  
it or whatever, and like uh-

They're gonna [take on] this [added debt responsibility], but they're not  
gonna get like, much in the way of like uh- [compensation] for all of their  
[hard work] or their [trip] to [school] or whatever, right...?

91    MCCS   00:45:04 And then so like, the companies that issue these loans, they'll have  
[predatory lending practices] even, ya know, this is something that [ITT Tech]  
like uh- experienced, uhm...

And uh- what happens is uh- the [people] that like [invest] in the [student loans],  
[they make a lot of money] off of like, [people not finishing] to [pay] their  
[student loan debts].

Basically it's like a [residual], it's like [residual income].

92    MCCS   00:45:35 When they don't [pay] their- their [loan payments].  
Right...?

So like, what happens is this.

Uh- they're [able] to uh- [place bets], on whether [some individual]

will [finish school] and [finish paying off their loans], or...  
[whether they won't].

And uh- the [way] they [have] it [set up], is that it- it's not unlike  
[car payments] and their [cars] being- people's [cars] being [repossessed],  
and the [banks] having to like, [recoup their money] somehow...?

And like, the [insurance companies] also getting involved in this...?  
Right...?

93    MCCS   00:46:09 [All of these industries], have like a [circle of fifths] going on, where like,  
[even if the person cannot pay] for the, the thing...?  
Or [they don't have collateral for it]...?

They've [posted up], like, [everything they need] to [come clean on their end].  
And to [get their- their money back, or their interest].

And that is the reason why, if [Joe Biden], like, cancels- like, goes around  
and [forgives student loans] and stuff...?

A lot of people that were [getting residual checks], for people [not finishing]  
the [payment of their loans] and stuff...?

They're not gonna get that [interest anymore] if the [loans] are [forgiven].

94    MCCS   00:46:49 No... so like, it basically, [it violates their entire corrupt system].  
And, believe it or not, there are like [a ton of industries] that [do]  
this shit.

Though like, I don't know the [particulars], I just know that like, it's  
[happening to a lot of people]. Where, people can [easily] get a [loan]- a  
[student loan] to [go to school] and stuff, right...?

But- if they want a [business loan], for their [business]...?  
Then, they're basically told to [fuck off], because...

95    MCCS   00:47:24 You gotta have like uh-  
You gotta have [(100) rings]...?

From like, [Sonic the Hedgehog 2]...?  
You gotta have the [(7) Chaos Emeralds]...?

You gotta like, jump, after you collect at least [(50) rings]...?  
And then you gotta turn into [Super Sonic], and you got the blonde hair,  
you're not the [blue hedgehog] anymore...

You're the fuckin', you're the- uh, [Super Saiyan] lookin' hedgehog...

96    MCCS   00:47:47 Your hair's all blonde, or whitish...?  
You look like a meaner version of yourself...?

And uh- you're not even, your feet aren't even touchin' the ground  
anymore, you're just gliding above the ground, and you're flyin'  
around like [Superman], basically.

And uh- then like, at that point...?  
Then uh- you have to go through [the whole game]...?  
And beat [Dr. Robotnik] about (12)- (8) times...?

[(12) times]...?

97    MCCS   00:48:12 Uh- you have to beat, [Dr. Robotnik]'s stupid fuckin', uh- boss...?  
Uh- the first level boss...?

And then like, the- then you get to fight [Dr. Robotnik] himself,  
in one of his stupid fuckin' machines and stuff...

And then, uh- then you go onto the [next stage], then you do this  
for like, ya know, [(12) stages], and then on like the last few  
stages...?

You have like uh- like a [THIRD stage]...  
So like, the [second stage] becomes like another stupid robot...?

Maybe the [same stupid robot] that you beat in the [first stage], again...?

And then, uh- the third...?  
Uh- the third one, then you finally fight [Dr. Robotnik], and he'll be like:  
[Dr. Robotnik]: Ha ha ha, you're fucked now, [Sonic]...

But, you're [Super Sonic], so like, you can literally just fuckin' jump around like a fuckin' nutcase...?  
And nobody can really do anything about it...?  
Not even him...?

And then like, you destroy like, after you hit him [(8) times]...?  
You destroy his fuckin' stupid lame ass robot, again...?

And, then [his robot falls apart], and then, like, he might like, [run off like an idiot], or he might like uh- get like, into uh- his uh- [doom ship].

98    MCCS   00:49:23 And then you gotta [fly] through the [sky]...?  
                  With [Tails]...?

And then you gotta like, uhm, you gotta like fl- jump from like, platform to platform...

I'm basically describing [Sonic the Hedgehog 2], but like, ya know...

Then, uhm, then you have to meet up with [Mario], and then uh- then uh- you gotta tell [Mario]...

Hey [Mario], you need to collect all [(125) stars]...?  
And then you have to kick the shit out of [Bowser]...?

And then [Mario] does that...  
And then, when [Mario] does that...?

Then uh- then [Super Mar-], [Super Sonic], and [Mario], they- they do the [fist bump of doom], and then it causes like an [explosion], and then uh- an [explosion of coolness], and then what happens, is uh- then you get like, uh-

99    MCCS   00:50:09 What the hell's his name...?  
                  Uh- the [Echidna]... (*Not [Knuckles] the echidna...*)

I can't even remember his name.  
From [Sony Playstation]. (...[Crash Bandicoot]...)

I can't remember the fuckin' name of the stupid thing...  
He's not stupid, uh-

Anyway, uhm, the idea that I'm alluding to here, is this...

Is like, they really set up a lot of [complicated things], that [most people] are gonna [fail] to be able to [do], because they didn't [read] the [fine print].

And [reading] the [fine print] is [really important], because, ya know...?

If the [fine print] includes the [description] of [everything] that I just fuckin' said...?

You might be [better off] just playin' the fuckin' game [Sonic the Hedgehog 2]...

100   MCCS   00:50:55 And then like, beating [Dr. Robotnik], and collecting all the fuckin' [Chaos Emeralds], and then, eh- ya know, I'm making it- sound very [long winded] and like, [complicated] for a reason, right...?

101   MCCS   00:51:11 It's basically like uh- the- the [level] of uh- [treachery] that [some wealthy people] have [established] with the [banking system], and the [blacksmith] of [doom] that's on the [other side of the planet] that has an [unlimited amount] of [gold] that it can [provision] to [people].

So basically, what causes [some people] to [become more rich], is uh-  
[other people's misfortunes].

And, [those misfortunes] are basically like, ya know, [preventing] certain  
people from like, having a- a- [a modicum of success].

102 MCCS 00:51:44 Right...?

And uh- everybody has a [different definition] of what [success] means.

Does [success] mean that you're gonna have [billions of dollars] like  
[Bill Gates], or [Elon Musk]...?

Well, [a lot of people seem to think that].

But- ya know, uh- [that doesn't necessarily mean that], uh-

103 TXT 00:51:44 =====

Consider the story of [Elizabeth Holmes] or [Samuel Bankman-Fried]

104 MCCS 00:52:25 Right...?

And then you can [start to focus] on like [what things] [people] will [need]  
in the [future], when [the entire system] that we have [now]...?

[It collapses].

Because like, there's a [level] of [unsustainability] with uh- [our society]  
right now, there's [a lot of things] that are [thrown away every day],  
[there's a lot of people] that like uh- they [build] a [house] and then the  
[house] gets like, uh- [repossessed]...?

105 TXT 00:52:25 =====

Or in some cases, [Eminent Domain], the gov't just takes back the house  
and land [forcibly] and you have [no control over it].

They can even take the [house] and [property] away [illegally],  
and [not compensate the owner].

106 MCCS 00:52:50 And then, in many cases like a house that like they- someone, like- if  
[someone] gets a [mortgage] on a [house], and they [pay half of the mortgage],  
[they don't get half of that money back], [they don't get that money back],  
if they [can't continue to pay it off]...

No, [they lose it all].

[They forfeit it all].

107 MCCS 00:53:08 Oh boy.

[They forfeit it all].

Same thing occurs with the [cars].

Right...?

And so like, the idea behind like, uh- [collateral], is [pretty important], because  
like, you [need] to [have enough collateral], in order to like, [convince]  
somebody to [place a bet], and [see the odds] as like, ya know,  
[in their favor].

Because if the [odds] are [in their favor], and then they [win out big time],  
you can [bet] your [ass] that [they're gonna fuckin' go ahead and bet],  
[very easily].

But if the [odds] are [AGAINST] them...?

You can [bet] your [ass] that [they'll spend money], to like, [find some way] to  
[fuck you over].

108 TXT 00:53:08 =====

That is the purpose of [cyberattacks] and [corporate espionage] with [tools] from the

[Central Intelligence Agency/Vault 7], or the [National Security Agency], such as the things [Edward Snowden] leaked in (2013), and [Julien Assange] leaked in (2017)

109 MCCS 00:53:51 Ohhhhhh... so [that's] what our [society] is like, uh- heh.

That's what it [devolves] to, is... [finding ways] to [screw people over] without having to [openly admit] that [that's what they're doing].

It's what a lot of people do...?

But- ya know, like- [screwing other people over], ya know, to [what level], do they [do] this...?

Do they send a [team] of [hitmen] with [rifles] and [knives] to like, come like, [gut you like a fish]...?

Well, [in some cases] that'll be the [military] that does that.

110 MCCS 00:54:25 But- ya know, they're [not] gonna [send] the [military] after a [fuckin' citizen] that's [not payin' his student loans], no.

If anything, what they'll do is, they'll try to like, send a [bunch] of like, [police officers] to like, [smear] somebody's [record] a [thousand times], instead of like uh- [doing their job correctly].

And what they'll do, is they'll [drag their feet].

And, it'd basically be like uh- ya know, uh- like a [full-grown man], going to the [island] with a [bunch] of [kids] in uh what was it, uh- what's the [name] of that [book]...?

111 MCCS 00:55:05 Uh, [Lord of the Flies]...?  
Right...?

You go to this island [Lord of the Flies], and you're a [full-grown adult], and [all these kids] on the [island] are tryin' to [tell you what to do], or whatever, and you're like:

[You]: Nah, dude...

Uhm, ya- just [shut the hell up]...?

Heh.

You do what I tell ya to.

And it's like, they're like:

[Kids]: Nope, that's not how we do things on the island of [Lord of the Flies].

You're in trouble now...

112 TXT 00:55:05 =====

Perfect metaphor for [SCSO K. Rossi] in this audio recording...

[Name] : SCSO-2023-013374.mp3

[Date] : 02/26/2023

[Start] : 19:17:16

[Duration] : 00:07:28

[Link] : <https://drive.google.com/file/d/1CvP8z-AsrOUFZTV4J5Yg2Y5afkMvEmZP>

113 MCCS 00:55:33 That's basically a [metaphor] for like, [how our gov't gets down].  
Right...?

It's not a [consistent case] where like, [everybody] uh- they have [smart people] in the [gov't], and they have [honest people] in the [gov't], too.

They also have some like [incredibly] uh- [douchebaggy people] in the [gov't]. And, they also have some [very dangerous people] in the [gov't].

Right...?

114 MCCS 00:55:52 And, they don't wanna [openly admit] these things...?

Uh, the [people in the government], they know that they have like, some fuckin' [shady trollmeisters] amongst them, and they also know that they have [more integrity] than like, [a lot of people in society]...?

So like...

They have to like, [get along with each other] like, I dunno.  
I really don't know how to [describe it], but- you know, like uh-

[Our entire society] is [full] of [people] that uh- they- they [mix] and  
[match] like uh- [what their values are].

115   MCCS   00:56:24 So, what I can say, is this, [what] gives the [paintings] their [value],  
is [not] just the [amount of time] that uh- a [person] put into [painting]  
the [painting]...?

But also like, [how much time] they [put] into [developing] the [skills]  
to be able to [envision] the [idea] within the [painting].

116   MCCS   00:56:42 Right, and so like, uh- I was looking at this [one painting], and it had  
a [reflection], and in a- it was basically a [picture], of a [pond] within  
the [woods].

And on the [surface] of the [water] you could [see] a [reflection] of like  
uh- uh- a- the [sky], or the [trees] and stuff...?

And I thought that was [pretty cool].

117   MCCS   00:57:02 Right...?

But- um, ya know, when it comes to an [appraisal] of a car, it really just comes  
down to like, [reading a god damn blue book], and just [determining]  
whether the [car] is [screwed up]...

Right...?

118   TXT    00:57:02 =====  
Like getting a [Carfax], not taking the [Carfox]'s word for it.  
=====

119   MCCS   00:57:14 Uhm, and then also, uh- when it comes to [appraising] a [house]...

The [quickest way] that they can [appraise] a [house], is by like,  
[taking a look at it], and seeing if it's like, [perfect] from the [outside].

120   MCCS   00:57:33 If it's [not perfect] from the [outside], they're gonna tell ya "Bye."

But- if it is [perfect] on the [outside], then they'll take a look [inside], and  
then they'll look to see if the [aesthetics match up], and the [measurements]  
are [level], and this, that and the other thing...?

121   MCCS   00:57:49 And they'll get very, uh- into the [nitty gritty] of like, how uh- everything  
[appears], [appearances].  
How things [appear].

And [that's what they will work with].  
How things [appear].

Because, [underneath everything] that [appears] before their [very eyes], they'll  
be able to determine whether or not things are [structurally sound].

In many cases, like, there could be [problems] [hiding] in [plain sight], but- as long  
as everything [looks perfect], then [it doesn't matter].

122   MCCS   00:58:17 And, then they can, like [evaluate] this [(400,000) dollar house], to be  
worth [(400,000) dollars].

Right...?

And uh- ya know, [owning a house] costs [money], so it's not just [paying]  
for the [house itself], but like, it also uh- can- it also uh- [requires] like,  
[maintaining the house], and uh- [keeping it in order], and uh- there's a [lot]  
of [money] that [goes into being a homeowner].

But- ya know, once [somebody] is [stuck] within a [home], and then you try

to like, uh- do the same thing that [Morpheus] does to [Neo] in [The Matrix], ya know, [some people] will [realize]: "Holy fucking shit..."

...when they're [knee deep] in the [middle] of a [car payment], or a [student loan], or a [mortgage], or uh- having some level of a [repair] or whatever done...?

And like, they just write it off, they're just like:  
"Well, whatever dude. There's nothing I can do about it, I'm stuck."

123 MCCS 00:59:19 Right, and [someone else] basically [owns] that [person].

[They don't see it that way], because [they see themselves] as the [owner] of the [house], or the [car], or uh- the [student loan]...?

Or the [education] or whatever...?

But- [someone else owns that person], and until they [pay off the house], they're [stuck] right in the [middle] of a fuckin', like, they're basically [turning their life] into uh- [someone elses' wealth].

And the [amount of time] they spend [doing] whatever the hell they [do], and [our society is full of this], ya know...?

124 MCCS 00:59:52 It's like, unless you get to- you could make it [(29) years] and [(6) months] into a [mortgage payment], but like, if you [break both your legs] in the last [(6) months], and you've got [no way] to pay the- the [remaining balance] of the [mortgage] or whatever, and you can't get it like, uhm, you can't get the [balance] like, uh- [refinanced], or whatever...?

They will [come] and [repossess the house], and the [(29) and a half years] that [someone spent], [dutifully paying their mortgage]...?

[They lose out] like over like, [less than like (2) percent], of like, eh- maybe like, [less than a fraction of a percent], of uh- [the remaining balance] that [they had left to pay].

125 MCCS 01:00:37 Which is a [tragedy], because heh.  
Ya know, it's [all] or [nothing].

It's basically a [game], and uh- there are so many uh [layers of deception] involved in uh- ya know, whether it's [owning a car], or whether it's [owning a house], or whether it's owning- really, even [property].

Eh, because [owning property], you have to [pay the taxes on the property].

You have to [pay the taxes] to the [schools]...?

And the [schools] [teach the kids] how to like, ya know, uh- basically do [everything I've explained] in this [whole audio log].

126 MCCS 01:01:24 [That is what they teach the kids at the school].

Ya know, they [do teach them] a lot of like, [helpful things in life], [I'm not discounting that]. But they [ALSO] like [teach them things], to where they have to [make certain assumptions] about [what] they're being [educated] about.

So like, if somebody's who's [good looking], and uh- ya know, [liked] by a [lot] of [other kids] in their [class]...?

They're gonna be, like, uh- they're gonna be, [respected] by the [other kids].

And the [other kids] are gonna be like:

[Kids]: Hey, uh- you know, uh- [we think you're cool]...?

And we want you to be like, the [leader] of the [debate club] and everything...?

And then the [leader] of the [debate club] goes around, tellin' everybody:

[Leader]: Hey, I'm gonna be like uh- uh- the [mayor of the town].

I'm gonna [clean this town up].

127 MCCS 01:02:04 And then what they do, is they wind up, doin' uhm, they wind up like uh- [backpedaling] on their [campaign promises], because [someone came along] and they were like:  
[Someone]: Hey.

How would you like to, ya know, be [freed] of the  
[chains of humanity]...?

And they'll be like:

[Leader] : Well, [what the hell do you mean] freed of the [chains of humanity]...?

[Someone]: Freed of the [chains of humanity] means that like, I'm gonna throw  
you such a [large stack of cash], that you'll [never ever ever] have to  
worry about paying a [mortgage], or a [car loan], or uh-  
a [student loan] ever again.

128 MCCS 01:02:43 And then like, they'll be like:

[Leader] : Well... uhm, [hell yeah]!  
I would like that a [lot]~!

And then they'll be like:

[Someone]: Alright, so, [go ahead] and uh- [sign your soul away], right now.

And then, [that's what they do].

[They sign their fucking soul away].

And then, they basically become a [puppet], of [somebody] with a [lot]  
of [cash] that [told em what to do], and [how to do it], [how high to jump],  
and then [they become that person's property].

129 MCCS 01:03:10 [Believe it or not].

The [coolest kid in class], becomes [another person's property],  
and then like the [coolest kid in class], like he [drives around]  
in this [really cool car] all the time...?

He's got a [(400,000) dollar house], or a [(600,000) dollar house],  
and like uh- ya know, like, he has to [keep up appearances], and like  
if he [ever] comes across [somebody] as [intelligent] as like,  
[Michael Cook]...?

He's gonna [run his fuckin' mouth] and say:

[Leader]: [That dude's a fuckin' douchebag].

Ya know...?

He [always has been]...?

[Always will be]...?

His [father] was a [douchebag too]...?

[Fuck that guy], [that dude's a fuckin' douchebag].

130 MCCS 01:03:45 Right, and the [reason] that they [do] it is because, like,  
[they have no control over it].

[They really don't].

Ya know...?

They'll say "*No, I definitely have control over it...*"

But- ya know, like, [actions speak louder than words].

Ya know...?

And [that is how our entire society works].

131 MCCS 01:04:03 Ya know, I'm goin' all the way back down to like, the [primal roots]  
of how [humans evolve] and everything, right...?

[At the end of the day], this [entire system] is gonna [collapse],  
mainly because, like [at some point], uh, the [power-] uh- [grid],  
as well as the [telecommunications grid], [at some point] in the  
[future], these things are [gonna be free again].

They're go- [there's no way around it].

It [WILL] be [free], [power] will be [free],  
you'll be able to [heat your home] and [power your home],  
with [solar energy].

132 MCCS 01:04:38 And then they'll have to like [send people] to [go around] and  
[sabotage] people's [solar panels], be like:

[People]: How dare you use [renewable energy], you [stupid son of a bitch]...

Nah, now your [solar panels] aren't workin'...

How do you like that...?

Ya know, [someone's gonna catch on really fuckin' quickly], and be like,  
why the hell isn't my [power] lasting an [entire day]...?  
Or an [entire week]...?  
Or an [entire month]...?

133    MCCS   01:05:02   Ya know...?

Not unlike when there's a [hole] in somebody's [gas tank]...?

[They're not gonna get very far], when their car, uh- tank-  
their [gas tank] has a [hole] in it, no way dude.

You're not- you're gonna be like, you're gonna be like  
"Well, what the fuck...? I smell gas..."

Ya know, then you're gonna keep drivin, and then like, and you'll be like:  
"Well dude, I fuckin' smell gas, and I didn't even like, open the gas can."

134    MCCS   01:05:31   And then like, they're gonna get like, half the distance they normally  
would, and be like

[Someone] : What the fuck is goin' on, dude...?  
I'm only gettin' like (150) miles a tank...?  
This is bullshit...

And basically, they won't know whether or not like, [GM] just sold them  
[another shit car]...?  
That just [suddenly stopped getting] the [mileage] that it was  
[supposed to get]...?  
Or, what was advertised...?

Or, some [shady trollmeister] somewhere, like, they [turned a knob] in the  
[engine compartment], so that the [engine] runs a [little more rich], and  
then it [burns through the gasoline a lot faster].

135    MCCS   01:06:07   And this might be something that a [warranty] uh- uh- someone like  
[Northstar Chevrolet] would do, when you [pay] for a [warranty].

The [full bumper-to-bumper warranty 5000], and then you go to bring the car  
in to get service, and then they say:  
[Northstar]: Oh yeh, the car had all these problems, right...?

And then, they fixed all [those problems], but-

[The problem that you brought it there for]...?  
[It still has that problem].

This is what [Northstar Chevrolet] did to me with my  
[2004 Pontiac Grand Prix], ya know...?

[Paid through the nose] for that fuckin' [vehicle], and I was [upside-down]  
in the [car loan], when uh- the fuckin' [engine], uh- [died] on me. I- I had  
a [year and a half] worth of [payments left], and my [engine], it just [died].

And then, uh- that was at like, [(105,000) miles].  
Or maybe it was the [transmission] that died first...  
I can't remember.

136    MCCS   01:07:01   But I know that the [transmission] and [engine] [died] in [that vehicle],  
and I had to get them [both replaced], [separately].

Ya know the car made it about [(280,000) miles], would've been able to drive  
the car to the moon, with that fuckin' thing.

But, you know uh- [General Motors] [designs] their [vehicles] to [break down],  
and uh- ya know, there are [so many things] in our [society] that are [designed]  
to [break down] and [produce waste], because...

[Waste] puts [money] into [certain people's pockets],  
and it [takes opportunities away] from [other people].

137    MCCS   01:07:37   And then they're told that like uh- ya- ya know, I'm not gonna get into  
the nitty gritty of like uh- how uh- [how deep the layers of deception]

truly are...?

But what I can say is this, they do say that [hindsight is 20/20].  
Right...?

[Hindsight is 20/20].

So like, what- what they're basically saying, is like, you have to like,  
be [quick-witted enough] to [know what the hell's goin' on] right in front  
of you...?

And [in order to do that], you [have to know things ahead of time].

So, [in order to know things ahead of time], you have to [know] what  
[someone else has done beforehand], and uh- their [experience] and their  
[education], and [their life]...?

Right...?

And, uh-

[They] will [work really hard] to [disillusion everybody] from  
[payin' attention] to [somebody] that's [been around] the fuckin' block...?

138 MCCS 01:08:35 And has had [all] these fuckin' [stupid scams happen to them]...  
Right...?

So, [here's an analogy], uhm...

I've been puttin' like [slices of pizza in a bag], right...?

And uh- this uh- [my backpack] has like I'll- I have- I'll [occasionally]  
put like a [can] of uh- like uh [cologne] or whatever the hell it's called,  
like [body spray]...

And uh, [sometimes] what'll happen, is the [top] of it will like, [break off],  
and then it will like, [spray out all over the inside of my backpack], which-  
ya know, makes me [smell]- makes my [backpack smell] like uh- [cologne] or  
[body spray] for a while, right...?

139 MCCS 01:09:20 But- ya know, like, uh- the [slices of pizza], when I go to [heat them up],  
they'll [taste] like the fuckin' the [cologne], or the [body spray].

And I'm sittin' there thinkin':

[Me]: What the fuck...?

Ya know...?

How the hell did it get through the bag...?

Ya know, [here's the best case that I can make].

Right, um- when uh- [dogs] or [canines] that [work] for the [police], they- they  
[smell drugs] and stuff...? It works the same way as like, [detecting bullshit]  
that people say.

Right...?

Uhm, like the [smell permeates other substances], and it [carries forward] like  
[osmosis] through a [membrane].

140 MCCS 01:10:01 So [osmosis] is sort of like how [water] will [pass through a membrane], right...?

And uh- the [way] that it [does it], is because the [molecules] are [able] to  
[pass through], like, the [thing] in the [middle]. Typically, it'll be like [glass]  
or it'll be like uh- what the hell, uhm, [plastic]...?

[Glass] or [plastic]...?

Right...?

It can also go through like uh- [varying other membranes] and stuff too, right?

141 MCCS 01:10:33 But- ya know uh- the [thick] and [thin] of it, is this...

Well, [some people are pretty stupid], and uh- [they] think that [other people]  
are [idiots]. And like, [when somebody isn't an idiot], they'll actually  
[single that person out], if they're [not playing along] with the, the [game]

that [everybody else is playing].

Right...?

And then, like, [everybody] will [work against] this [(1) person],  
that isn't like [tied] to the [chains of humanity] at all.

142 MCCS 01:11:09 You know, the [chains of humanity], is probably gonna be the name of this  
audio log. [Chains of Humanity]... [I like that idea].

The [Chains of Humanity], um-  
Is basically like this...  
Possess-

[Jesus Christ] like, often [prophesized] about this, like uh-  
[possessions are chains]. Ya know, having [some possessions] isn't like,  
[bad] or [evil] or whatever...

143 MCCS 01:11:39 But- I think, that a [lot] of [people] put a [lot] of [emphasis] on like,  
[having stuff], and like, [if you don't have stuff]...?

Then you're a [loser].

And [you wanna know why people do that]...?

It's because [people] are [stuck] inside of like, a (30) year mortgage,  
where they have to make it an entire (30) years, so they can "own" their  
house for like (10) years while they're [retired].

Yeh.  
So like, that's how it is, it's like...

144 MCCS 01:12:18 Somebody who's a [first time house buyer]...?  
They [buy the house]...?

They spend the (30) years paying off the mortgage, and [owning the house] and everything...?  
And then like, oh, at some point, oh.

They- [they can't work anymore], so [they gotta retire]...?  
So, [did they save up for retirement], too...?

Oh, [they saved up for retirement too], oh, [good].  
[Ok].  
[Good].  
So like...

145 MCCS 01:12:41 Their [retirement accounted] for them to be able to uh-

Ya know, uh- be able to- ya know, [buy breakfast, lunch, and dinner] for the  
next fuckin' [(15) years]...? And uh- you know uh-, maybe the maximum like,  
amount of like, [leisure] they have when they're [that old]...?

...is uh- [going to the library].  
Yeh.

146 MCCS 01:13:06 So [they go to the library], and they [study up] on [all the things] that like,  
[Michael Cook] was attempting to [teach them], like [(30) years] before they  
retired...

And then they found out:  
[Them]: Holy shit.  
That dude [Michael Cook] was onto something,  
[why the hell didn't I listen to him]...?

Nah, here- [here's the reality].

[Some people] um, they're [gonna get ahead of all these things], and the [way]  
they're gonna [do it], is by [listening] to [guys] like [Jeremy Rifken] FIRST,  
ya know...?

[People aren't gonna wanna listen to a lot of the things that I say FIRST],  
I understand that.

But, ya know, in order for me to be [taken seriously]

from now until the [future]...?

Um, [people] have to [understand] that at [some point],  
[our system is gonna collapse].

It's not unlike how uh- uh, [Rome collapsed], or uh [Greece collapsed].  
The [Roman Empire]...?  
The [Byzantine Empire]...?  
They collapsed...?

147 MCCS 01:14:02 [Why did these great empires collapse]...?  
Well, it's because like, [humanity has a very serious flaw].

And the flaw is, [appearances]- it's- eh, [humanity] [operates] on this [notion],  
[seeing is believing], and then like, but- [they don't tell each other], often  
enough, [but appearances can be deceiving].

So what I mean specifically, is this...

You know, behind [door number (1)]...  
Behind [every door], there's gonna be a [hot girl], where you can  
[have sex with her], and [have a bunch of kids].

But- they all have a [varying alternate attribute].  
Right...?

Behind [door number (1)]...?  
Is the [hot-dumb bitch].

The [hot-dumb bitch]...?  
She likes to [lie a lot].

[Every time] that she [opens her mouth], you [never really know] whether  
you can [trust] what the hell she's [saying]...?

But, [she is fuckin' hot], dude.

Then uh- you don't know if you're gonna wind up [getting divorced]...?

Or, if your [mortgage] is gonna [fall apart halfway through]...?

Or if she's gonna like, [try to stab you to death]...?

Ya know, [these] are [things] that you're [not gonna fuckin' know about]...  
...um, [other] than the [fact] that [she is fuckin' dumb].

148 MCCS 01:15:19 Right...?  
And then behind [door number (2)]...?

There is a [smart girl].  
[Smart girl]...?

Likes to be [honest]...?  
Likes to [tell the truth]...?  
She's [very loyal], [very obedient], and uh- [she's got a lot goin' on for her]  
other than (just) her [looks], and uh- she isn't- thing is, is like,  
[she's not gonna tolerate being lied to].

[You need to fuckin' consistently tell her the truth], [at all times]...?  
And uh, [in exchange for that], [she] is [gonna be yours].

And you can have a [LOT] of kids with this girl, too...

149 MCCS 01:15:57 Right...?

So, [door number (1)]...?  
[Door number (2)]...?

And, [door number (3)]...?  
You've got the [mixed bag]...

You've got the [hot-crazy wife matrix of doom], shit...

| The Universal Hot-Crazy Matrix | <https://youtu.be/bbpGkrVi0cE> |

=====

151 MCCS 01:16:07 It's basically, a random, fuckin', a [randomly generated value]...  
Nobody knows what the hell is behind [door number (3)]...

You just know that it could be some [hot, really dumb bitch]...?  
Or it could be some [hot really smart bitch]...  
It could be, uhm, [hot-dumb-loyal]...?  
Or, [hot-smart-loyal]...?

Or, [hot-dumb and NOT loyal]...  
Or, [hot-smart and NOT loyal]...

[Because all these properties matter].  
Right...? (*This is all a metaphor for the Punnett square*)

152 MCCS 01:16:36 And, [in order to understand] like the [true value] of [all]  
these things, of [all] these particular [girls]...?

You have to have a [courting session] with them.  
So if like, [most people in society], they just like, fuckin' uh-  
[hook up] with the [first girl] that they [see] all the time...?

They're not gonna be able to [understand] whether that like,  
[decision] that they [make] in [one day]...?

Is gonna [alter] their [future] in [(15-30) years].  
Ya know, like um-

153 MCCS 01:17:12 The [idea] behind [marriage], is like:  
*"Oh, [as soon as you get married to somebody], you're like [TIED to somebody]."*

And uh- [another thing] behind [marriage] is like, [how much money] goes into like,  
a [relationship] or [whatever].  
Right...?

So, all these things that I've said, [they don't account] for like uh- the  
[regrets] that [people have], [later in life].

154 MCCS 01:17:38 Right, [some people], they're gonna be like, uh- [reluctant] to- to [say]  
whether they [regret] something or not...?

Because like, they might make it like [(20) years] through their [mortgage]  
and [pay off their house] and everything, but-

You know what...?  
They're like, [upset with themselves], because they [realized] that if uh-  
[they made] a [couple of other choices] that [weren't so risky]...

They could've uh- had a [plan for success] that [didn't involve screwing other  
people over] or [lying to them], but it [involved] just [manufacturing something]  
that was uh- gonna [produce a lot less waste], that was gonna be uh- [renewable]...?

And it offered some [smart ways] to [improve] their [quality of life]...?

155 MCCS 01:18:33 So these things are [very important], because, like...

[We have this technology now], it's the [first time] in [human civilization],  
where we can really [fine tune] the [amount of things] that are [being wasted],  
and- [that's what the future holds].

The [future holds] like, the [idea] that uh- [humans have to be more resourceful],  
[less wasteful], and uh- to uh- to [start to filter out] what [properties] they  
[believe] and what they [don't believe].

And what- [from what I can tell], like there's a [lot] of [people] in the [gov't]  
that like, continue to be [lobbied] by [some rich bastard] who's [corrupt].

156   MCCS   01:19:09 And like, they act like [Joe Manchin], and [Joe Manchin], or [Paul Manchin],  
                  he's gonna continue to say:  
                  [Manchin]: I don't like the [student loan forgiveness package of doom]...  
                  Nah, [I don't like the way it looks].

Nah, there's a [reason] why he's [sayin'] he [doesn't like] the [way] it [looks].

It's because a [lot] of [people] all around the [country], that have been  
[giving], that have been [sucking off] of like, [somebody's fuckin' teat]...?

Ohhhh, [they don't like the idea] of the [teat] being [taken away forcibly],  
and so [what they're gonna do], is they're gonna use [every fuckin' tool] at  
their [disposal], to [continue being like the slave masters back in the 1800]'s.

157   MCCS   01:19:45 Yeah.  
                  That is, [effectively] what uh- [our society does right now].

Right...?  
A [lot] of [people] in our [society], they don't [realize] that like, [they]  
operate [exactly], in a [nearly identical way] to how the [slaves] used to  
[operate].

Except, like uh- the way that it's [different now], is like, instead of [slaves]  
workin' for [free], they're getting like, [paid], and they get [housing] and  
everything...?

Well, um...

158   MCCS   01:20:08 Now, like [everybody] is like [forced] to like, [live around the poverty line]  
                  or [below] or [above], or [whatever].

They do a [really good job] of makin' it [seem like] they [give] a [shit] about  
the [ordinary every-day, citizen]...?

But- [I'm pretty sure that they don't], because, you know, [situations] like  
[Richard Sackler]... [Richard Sackler] can like, uh- [make this drug] that is  
[very addictive], and it [got a lot of people addicted], it got a [whole industry]  
like, screwed up...

And uh...

159   MCCS   01:20:47 Ya know, the [legacy] of [Richard Sackler] is [not] a [good one]...

But- there are [a lot of people] that will basically [chortle] on his [nutsack],  
and like, [do whatever the hell he tells them to].

There's [a lot of people in the fuckin' government] that do that shit.  
For [Richard Sackler].  
They'll [jump in front of a bullet] for [Richard Sackler].  
Or, [maybe they won't]...

Ya know, they'll be like:  
[Them]: Well, I wouldn't [jump in front of a bullet] for [Richard Sackler], but...  
          Ya know, if he's gonna throw me a stack of [(50,000) dollars]...?  
          [I'll fuckin' take it]...  
          And then uh- I'll just [tell] like, [everybody] that [tries] to [attack]  
          [Richard Sackler] to [fuck off]...  
          And [then], [I'll shoot them]...

160   MCCS   01:21:31 Yeh, so like, what I'm- so- [alluding to], is like, [Richard Sackler] has his  
                  own [security team]. Ah- uh, [more than likely].

Ya know, he's [got enough money] to fuckin' pay for... [enough weapons], and uh-  
[ammunition], to like, [keep himself] like [protected]...?

Ya know, he's not gonna be- [people] aren't gonna [think well] of [Richard Sackler]  
for the [forseeable future], but ya know, [his life], uh- it's [protected].

Right...?

[A lot of people work to protect him], and uh- ya know,  
[a lot of people in the government], have worked to uh-

Effectively what I'm [alluding to] is this, like,  
[money causes people to act pretty fuckin' stupid, sometimes].

161 MCCS 01:22:14 Ya know, I don't wanna say it's like a [consistent case] where like, [money] causes people to thi- [think] or [do] [stupid shit]...

But, it's [often enough] to where like, sometimes you can [ask somebody]:

[You] : Would [you] [suck some dude's dick] for a [million dollars]...?

And then like, ya know somebody might say:  
[Somebody] : Yeah, I'll do that.

And it's like:

[You] : Well, what if I record it on video...?

Then they'll change their answer, and be like:

[Somebody] : No no no, no no no, [not if you're recordin' it on video]...

...then I wouldn't.

Nah nah nah, I wouldn't suck-

[Wouldn't suck some guys dick] for a [million dollars] if uh-  
you were [recording a video of it]...

[You] : Well, why not...?

162 MCCS 01:22:45 [Somebody] : Uh, because [I wouldn't want other people to see that video].

[You] : But- you said that [you] would [do it] for a [million dollars]...?

[Somebody] : [Not if other people could see it], though.

[You] : Well, why not...?

[Somebody] : Well, [because other people would be able to see me]  
[suckin' some dude's dick] for a [million dollars].

And then-

[You] : Oh, well, but I mean...

[Why would that change your mind]...?

[Somebody] : [Because other people would see it].

[You] : Oh, well, [just because other people could see it], doesn't,  
ya know, well, how, [why does that change your mind]...?

[Somebody] : [Because other people would see it], and they would [realize]  
that [I sucked some dude's dick] for a [million dollars].

[You] : Oh, so if [other people SEE it], then [you wouldn't do it]...?

[Somebody] : Right.

[You] : Alright.

163 MCCS 01:23:21 So, the [concept] there, is that [as long as people can do things] where  
they're not being [seen]...? Uh, then [they'll continue to do those things],  
because [they're not being seen].

And, the [problem] with [humanity], is this...  
Right...?

There exists, [a dimension above us], where [all] of the [decisions] that  
[we] have [ever made] (or *have yet to make*), for our [entire life] have  
[already been seen] and [witnessed], and [categorized], and uh- ya know,  
[some people are really stupid]...?

And they think that is [babbledly-gook], and [those] are the [types of people]  
that [like to suck somebody's dude's- somebody's dick], for a [million dollars],  
[as long as they're not recorded] or [seen doing it].

164 MCCS 01:24:04 Yeah, so the [concept] that I'm [alluding to] is like, we live in a certain  
dimension, and uh- I'm gonna touch on this [Carl Sagan] metaphor here, right...?

So [Carl Sagan], he's like:

[Sagan] : You get a bunch of [2D flatlanders], right...?

And then you get a [sphere], and then you [take the sphere],  
which is a [(3) dimensional object], and then you have to [cut it]  
into [slices] so that the [2D flatlanders] can [understand] the  
[3D sphere].

Right...?

And as the fuckin' [3D sphere] passes through the- the [flatlander]'s world...?  
Then uh- the- the [flatlanders] are all like:

"[Holy shit]~! [What the hell is that thing]...?"

And then they're like:

"Holy shit, [that thing] is [fuckin' weird]..."

And then like, you know, uh- [the same concept applies] to how uh-  
a [lot] of [people] in our [society]...?

165 MCCS 01:24:58 They think that [as long as nobody sees what they do]- the [decisions] that  
[they make], that [there's no way] that [anyone] could- [would ever know].

And that's why, like [that's what's so dangerous about humanity], is that there  
are- [some people] that [think] that...?

[They're fuckin' stupid].  
Ya know...?

It's not like [every single decision] that [somebody makes], is gonna cause, is gonna  
cause someone like [me] to think that [they're fuckin' stupid] for [makin'] that  
[decision], knowing that [no one] could [SEE] what they were [doing], and that  
[no one] would ever know...

Right...?

But- [certain decisions] that [these people make], cause [other people] to have to  
keep [skeletons] in their [closet], and basically like, uh [suck on somebody's dick],  
for a [million dollars], and that's-

166 MCCS 01:25:45 [They're gonna continue to do it], because [people] aren't able to [see] them [doing it],  
they're [doing it] within the [shadows].

And [as long as nobody knows that they're doin' it in the shadows]...?  
They're just gonna [keep doin' it]...?  
And [no one] is [ever] gonna [stop them].

[UNLESS]...

167 MCCS 01:26:02 [People wise up].

And they [listen] to [some] of the [things] I'm [attempting] to [educate other people].  
[There are ways] to [see things], that [other people], like, will say:

[Someone]: There's [no way] that they would know, that [I made some decision],  
[as long as they didn't see it]...

Well, you really don't need to like, be able to [see anything], other than like uh-  
know that the same- the [metaphor] that I r- that I rose earlier, the [analogy] that  
I rose earlier, about like the smell...?

Of uh- the [body spray], on my [slice of pizza], from [within the bag]...?

168 MCCS 01:26:36 It's the [same concept] to like:  
[Somebody]: [No one will ever know] that [I sucked some dude's dick]  
for a [million dollars]...

Yeah.

Someone [WILL] know, it's just that like, [your idea] of [knowing] something...?  
Is like, basically [seeing] it.

And that would be [knowing] something.

But- [that's just an opinion].  
That is just [a fuckin' opinion], dude.

169 MCCS 01:27:05 Some people, they do this, where they're gonna fuckin' [suck some dude's dick]  
for a [million dollars], [as long as nobody sees it].

But, if you [ask them] the [same question]:

[You] : [What if I record it on video]...?  
[Somebody]: No no no, no no, I would NOT [suck some dude's dick]  
for a [million dollars] if [people saw it].  
[You] : Oh...

170 MCCS 01:27:26 Well, that's a [problem] because basically, [shedding some light] on the subject causes [somebody] to [change] their [decision making process].

Huh...  
[That's a fuckin' problem].

171 MCCS 01:27:38 End log.

 Conclusion /-----/   
 /-----/

In conclusion, the [Chains of Humanity] touches on many of the aspects that famous [comedian/philosopher] [George Carlin] talked about, in reference to [religion], [politics], and [money].

There's a reason why those (3) subjects in particular raise a lot of [controversy].

It's because they're all ways of [controlling other people], and [society].
