

The Hallway of Second-Place Vehicles

Every once in a while, I will see a REALLY COOL CAR... whether it's a McLaren, Ferarri, or Lamborghini...?
They all look EXTREMELY COOL.
They all come in SECOND PLACE.

Overview

Here's a few pictures of some really cool SECOND-PLACE VEHICLES...

[07/04/2022 - Lamborghini Huracan (1/1)]

[09/21/2022 - McLaren 570S (1/4)]

[09/21/2022 - McLaren 570S (2/4)]

[09/21/2022 - McLaren 570S (3/4)]

[09/21/2022 - McLaren 570S (4/4)]

[10/02/2022 - Ferarri 488 Pista (1/3)]

[10/02/22 - Ferarri 488 Pista (2/3) + McClaren 720S (1/2)]

Those are a few really COOL vehicles, aren't they...?
I have to agree. They sure are pretty COOL...

... for a bunch of expensive ass cars that use GASOLINE and STILL COME IN SECOND-PLACE...
... to the TESLA MODEL S PLAID, and- the upcoming TESLA ROADSTER Gen2. Both based on "ELECTRIC PROPULSION".

So, in this LAST picture, (2) dudes can be seen, standing right next to this thing that will EVENTUALLY be a "thing of the past", and they're called "GAS PUMPS".

The COOL thing about this LAST PICTURE...?
Is that there's a moron that's literally standing right next to the vehicle.
squinting Wanna know why I'm calling this dude a MORON...?

It's literally because I rode my bike up to them and said:

```

Me : Hey~!
    Nice set of wheels, dude~!
488 : Thanks~!
Me : How do these (2) cars stack up against the Tesla Model S Plaid...?
488 : *extremely concerned look on his face* Well, these two cars right here are the fastest cars out there.
    They're both FASTER than the Tesla Model S Plaid.
Me : Nah, they're not.
488 : I beg your pardon...?
Me : The TESLA MODEL S PLAID is the fastest production vehicle in the world.
488 : Well, yeah, I know that, but I mean, these cars are like a tenth of a second behind that thing.
Me : Nah, they're not.
    The TESLA MODEL S PLAID goes from ZERO to SIXTY in TWO POINT ONE SECONDS.
    That is WHY it is the FASTEST PRODUCTION VEHICLE in the world.
    By the way, it doesn't use any gas.
    What do these two get...?
488 : Uh, like TWO POINT SIX SECONDS from ZERO to SIXTY.
Me : Oh, cool.
    So you like literally just lied to me and thought I was stupid, and would think you were COOL, huh...?
488 : Yep, I sure as hell did man.
    Why, do you own a TESLA MODEL S PLAID...?
Me : Nope.
    I don't.
    Doesn't really MATTER though.
488 : Alright, well... piss off errand boy.
    We've got our gas tanks to fill, so...
    Run along now, and fuck off.
    We're WAY too cool to be seen around the likes of YOU~!
Me : Well, not for nothing, those are some REALLY COOL SECOND-PLACE VEHICLES ... ~!
488 : Thanks man.

```

And that is how EFFORTLESSLY I can MANIPULATE a couple of dudes that own some REALLY COOL CARS, into:

- 1) LYING
- 2) ATTEMPTING TO PULL A FAST ONE
- 3) FAILING

Here's the problem. The OIL AND GAS INDUSTRY does a lot to MINIMIZE the fact that the TESLA MODEL S PLAID, and ELECTRIC VEHICLES IN GENERAL... are 1) more environment friendly, 2) cheaper, and 3) use renewable energy.

Nah. The OIL and GAS industry knows that these (2) idiots, are basically little shill boys that think they're hot shit. Yeah, when you consider who comes in FIRST PLACE...? Yeah, these cars ARE all pretty COOL ... looking. They're not the fastest cars out there.

Here's why I am making a big deal about this situation.
A lot of people in AMERICAN SOCIETY, and SOCIETY IN GENERAL...?

They will BELIEVE what these guys say, because of how COOL LOOKING their cars are.
I mean, even if BOTH OF THEM had no ENGINES IN THEM, people will still be FLAT OUT IMPRESSED WITH THE WAY THEY LOOK.
What that ACTUALLY means is this.

People don't really give a shit about PRACTICALITY.
So if a TESLA MODEL S PLAID shows up, and smokes both of these fuckin' cars, and NEVER HAS TO STOP AT A GAS STATION...?
A lot of SHILL BOYS that SPENT A LOT OF MONEY on their SECOND PLACE VEHICLES, they will say to themselves:

/--_

Shill boys : *grumble grumble* It doesn't matter if my car is the fastest car out there at all.

Nah.

I can still pick up mad bitches, and tell them that it's wicked fast anyway...

And people will still be dumb enough to believe me.

How cool am I...?

I drive a SICK SET OF WHEELS.

Doesn't actually MATTER if it shows up in SECOND PLACE against an ELECTRIC VEHICLE.

Nah.

That shit's retarded.

/--

And, for what it's worth...?

They're right, people really are fuckin' stupid.

They'll believe these guys JUST BECAUSE OF HOW CAR THE COOL LOOKS.

The same thing APPLIES to the POLICE and LAW ENFORCEMENT SYSTEM.

The same thing APPLIES to the JUDGES and JUSTICE SYSTEM.

AS LONG AS SOMETHING MERELY APPEARS TO BE THE CASE...?

People are fuckin' morons and they will judge a book by it's cover.

It is a CONSISTENT CASE ACROSS THE FUCKING BOARD.

Humanity has a LOT OF STUPID PEOPLE IN IT THAT DON'T CARE IF THEY'RE RIGHT OR WRONG.

Some people DO care about whether they're RIGHT or WRONG.

But, the reality here is this.

These (2) dudes, lied to my face, the police do this too, so do the judges and lawyers and doctors, and THAT IS WHY THEY GET TO DO WHATEVER THE HELL THEY WANT TO. It's literally because NOT ONE PERSON STOPS THESE DUDES IN THEIR CARS AND SAYS "THOSE CARS SUCK ASS BRO. BUY BETTER CARS NEXT TIME~!"

Except ME.

I didn't even really tell them that their cars sucked ass, either.

They're PHENOMENAL ...

... in terms of maxing out at SECOND PLACE.
