Introduction

My name is [Michael Cook], I've been a resident of the town of [Halfmoon] since (1987), and am alumni of the [Shenendehowa Central School District]. I started [Secure Digits Plus LLC] in [October 2018] to focus on [application development], [virtualization], [network/hardware magistration] and [graphic design].

I didn't expect that I would have to take on other roles, such as [researcher], [developer], [journalist], and [investigator].

Some may say "*You're not an investigator.*"
Yeah, I am.

I know how to submit [F.O.I.L.] requests and review the handiwork of [police officers], and their work is often [very (shoddy/careless/mistake prone)].

I've contacted the [Federal Bureau of Investigation] multiple times.
I've contacted the [National Security Agency] multiple times.
I've contacted the [Saratoga County Sheriffs Office] multiple times.
I've contacted the [New York State Police] multiple times.

This is an [audio recording] of me [interrogating] [Investigator Jeffrey Brown] from the [Saratoga County Head Sheriffs Office] back on [02/02/2021]…

Date	Link	Duration
02/02/2021	https://drive.google.com/file/d/1JECZXhwpXFO5B8fvFnLftESp578PFVF8	00:20:02

The backstory of that particular recording, is that (2) dudes were using a dangerous program called [Phantom/Pegasus] on my [Apple iPhone 8+] to [locate me] using my device's [radio/GPS telemetry], and they [attempted to run me over with their vehicle multiple times] when using this dangerous fucking program on [05/25/2020] AND [05/26/2020], leading to [SCSO-2020-028501].

Here are the (3) pictures of these (2) douchebags ...

[IMG_0649.HEIC] [05/26/2020 0011]   [IMG_0650.HEIC] [05/26/2020 0011]   [IMG_0651.HEIC] [05/26/2020 0011]

Pardon my language, the police have been pretty obtuse about taking me seriously.
I think it is because [SOME of them are fuckin' stupid]. Let me repeat… some of them are *basically retarded*.
It is the only explanation that makes any sense to me, *extremely slow on the uptake*.

The [first incident] where they attempted to strike me with their vehicle was:
[05/25/2020 2315 @ Spare Time Bowling Alley]

I then took a number of pictures of the [Computer Answers] network that I was connected to, uploaded (3) audio recordings to my [Google Drive account], and then went across the street to the [Catricala Funeral Home], and took roughly (8-9) pictures with my [Apple iPhone 8+] smartphone.

I then ran into this (1) douchebag on foot in front of the [Boomer McCloud] plaza, and recorded him in a video that I was unable to exfiltrate from my device, because someone was applying interference to it preventing me from doing so. Then, the (2) douchebag was walking to the laundromat, and I also recorded him in the same video. Then, the (1) dude left in his black [Dodge (Dart/Charger)] that looked identical to the ones that the investigators at the [Saratoga County Sheriffs Office] drive around. Then, the (2) dude started chasing me.

I attempted to contact (911) emergency services the FIRST time, at:
[05/26/2020 0004 @ Halfmoon Sandwich and Sub Shoppe]

I attempted to contact (911) emergency services the SECOND time, at:
[05/26/2020 0010 @ Center for Security]

I then took the (3) pictures shown up above.

The [second incident] where they attempted to strike me with their vehicle was:
[05/26/2020 0045] @ Route 146 + Route 9] as they were exiting the [Lowes Home Improvement] parking lot,
and they turned right onto [US-9] headed toward [1769 US-9] where [Zachary Karel] used to live.

At about [05/26/2020 0120], I cut the phone line AND [Zachary Karel]'s kayak strap because I had a feeling
that whoever lived there, *(Zachary Karel was unknown to me at the time)* was involved in me being followed.
I was actually attempting to flag people down for help that whole time, to get assistance from (911).

Against the reporting in the above listed call for service [SCSO-2020-028501], [Scott Schelling] was the
first officer on scene, NOT [Sergeant Joshua Welch]. This is a [common theme] in nearly EVERY record in the
records I requested from the [Saratoga County Sheriffs Office] on [09/04/2020], there are details that are
[relevant] and [critical] that aren't being [documented correctly], or at all.

In the conversation that I have with [Investigator Jeffrey Brown], he seems rather oblivious that a dangerous
software application was deployed to my device, preventing my (911) calls from making it to the dispatch station…

However, I still have OTHER EVIDENCE, such as the numerous [HEIC (files/pictures)] that have details embedded
into the files that constitutes as an ALIBI …

Such as:
[+] [GPS location (longitude/latitude)]
[+] [time the picture was taken]

It is pretty stupid to argue with the (audio + HEIC files) that I uploaded to my [Google Drive account],
but my god … some of them will fucking argue with these [pesky details] that are in the files' [metadata].

[Metadata] is information that would be outside of a file, about the file. So, if I call someone a stupid
cocksucker in an audio recording, that won't be in the [metadata], but the (length/duration) would be.

Anyway, these [pesky details] are actually [vital clues] that the [Saratoga County Sheriffs Office], as well
as the [New York State Police] have blatantly overlooked. It can even be HEARD in the audio recording above,
where [Investigator Jeffrey Brown] starts '*stammering*' when I tell him that the officer in question, [Scott
Schelling], checked the [surveillance footage] to [corroborate my story] at the [wrong fucking place].

Oh wait, no, that was [Scott Carpenter] that responded to a DIFFERENT incident that occurred on [05/24/2020]
AFTER it was called in (3) days late by [town of Halfmoon Council member Eric Catricala], on [05/27/2020].
So, the event that occurred at [05/24/2020 1910] was separate from the event at [05/25/2020 2345], but
[Eric Catricala] felt that [Scott Carpenter] and [James Leonard] would have superhuman powers to merge them…
on [05/27/2020 1212] in the record [SCSO-2020-003177].

Sounds fuckin' stupid, right … ?
I didn't screw up their logic, nor the sentence structure when writing those statements.
That is perfectly sound logic that [Investigator Jeffrey Brown] has, in that aforementioned [audio recording].

I don't really know how else to explain it except like this…

Perhaps the way they see it, is that if something they do is really fucking blatant and stupid looking…?
 … they just [assume] that other people will make the [assumption] "*Sounds hard to believe.*"

Yeah well, [Eric Catricala], funeral home owner, calls in on [05/27/2020] about a conversation that he and
I had on [05/24/2020], and then he attempted to have [James Leonard/Scott Carpenter] get the events that
occurred (30) hours apart, stapled into the [same exact incident] without looking at the numerous [HEIC files]
that I uploaded which provide my [alibi] for the (2) tickets that this dipshit [James Leonard] handled on
[05/27/2020].

That's why I say that I'm an [investigator], on top of all the other shit I've specified thus far…

Side point, I just wanted this to be a [strong introduction].

While I have [many other exhibits]…?
 … I want to talk about [pertinent details] related to the [Clifton Park Halfmoon Public Library].

In this document, I'm going to use the [same format] that I've used in [other documents] I've written,
except- I will use [color] to make the document *REALLY* stand out, like a friggen [ninja].

I would like to [unpack] and [examine] the details surrounding director [Alexandra Gutelius] and the
[<ITdirectorunknownbattlegrounds>]'s decision to ban me from the library for a [second time], in response
to the document I received from the [security guard], [Kevin], on [09/17/2023].

```
                                                                              _____/
 _____/ Introduction
  \  Motivations /-------------------------------------------------------------------------\
   /------------/
```

The [first ban] on [10/15/2022] was resultant to me, opening up the [HP EliteDesk 800 SFF] desktop computers
in the [computer lab] for a video I recorded:

Date	Name	Link	Duration
10/15/2022	Intellectual Property Theft	https://youtu.be/-GScIS_PlOo	00:13:33

The reason I recorded that video, is because the [IT director/technician] had installed SSD's into [all] of
them at [my suggestion] in [this document] that I [printed], and [sent] to [Alexandra Gutelius] ...

```
/------------|-----------------------------------------------------------------------------\
\ Date       | Link                                                                         /
/ 10/01/2022 | https://github.com/mcc85s/TopDeckAwareness/blob/main/Docs/2022_1001-(CASSIE).pdf \
\------------|-----------------------------------------------------------------------------/
```

 ... in hopes that perhaps the people at the library might want to know WHY I was going to the library as often
as I was. I was less than formal in that document, but ...

The document starts out by discussing things like [espionage tools] in [Vault 7], developed by the
[Central Intelligence Agency], such as [Weeping Angel]. [Weeping Angel] was [reverse engineered] and
used by hackers and nation state actors to target people's [Smart TVs], in order to commit:

[+] [identity theft]
[+] [cybercriminal activities]

I was interviewed by [Andrew Banas] on the [WTEN Alert Desk] in [March 2018] to talk about [hackers] targeting
[Smart TVs] when I managed [Computer Answers] at [1602 US-9, Clifton Park NY 12065] for over (3) years.

```
/------------|-----------------------------|------------------------------|----------\
\ Date       | Name                        | Link                         | Duration /
/ 03/26/2018 | WTEN Alert Desk - SmartTV's | https://youtu.be/bPdWt7kcd3M | 00:02:00 \
\------------|-----------------------------|------------------------------|----------/
```

The document [also] discusses [hardware/network magistration], [security], [virtualization], and various
observations I've made about the [human condition] and [psychology] in general. Though, the [editing] and
[verbiage] isn't as [formal] as I typically am ... as I was sharing my [personal story] like I am now.

I have a [condition] that lies somewhere in the [Autism Spectrum] that causes me to be very [straightforward]
and [unnervingly honest] with people. It causes me to be [extremely observant] of other people's behaviors, and
it also causes me to lack the ability to sugar coat things in order to NOT hurt someone's [pride], [ego], or
[feelings].

This causes me [great difficulty] in being able to relate to people who [have] to use this [bullshit]
strategy every time they open their mouth in public, in front of other people.

In other words, when I observe morons doing dumb shit in rapid succession, it causes me to lose trust in
their appearance, and to use my [first amendment constitutional right] to label them as [morons].

I don't go around walking up to people and shout in their face "*You're a moron~!*".

It is a process that [takes some time] as I consider [each additional appearance that someone makes],
and make [mental notes] and [tally marks] dependent on how many times I [observe] someone putting their
foot in their mouth, or otherwise [acting like a dumbass] who thinks that [I'm the one whos being stupid] ...

 ... when in reality, it's [just them] and [that's it].

(Many/SOME) of the police I have encountered are [experts] at this process, but it [also] applies to *SOME* other
people, such as: [doctors], [lawyers], [judges], [family members], [friends], and et cetera.

[That's why I record so many videos and audio recordings], because [without] them, anyone can just say whatever
they feel like, especially if it is [inaccurate], [misleading], [false], [erroneous], [malicious], or otherwise
[clandestine] or [moronic] … or some (variation/combination) of (any/all) of those things in conjunction.

That was SOME of my rhetoric in the document listed above.

Now, what does that have to do with the [first ban] or even the [second ban] ... ?

Well, examining WHY I'd [write a document] or [use the language that I did], is [pretty important] to [question],
and people tend to [make a lot of assumptions] and base their decision making processes on [social hierarchy],
rather than basing them on things like [facts], [evidence], [(video/audio) recordings], [reports], and [documents].

If people were to [question] the things I write, and talk to me about their concerns, then there would be an
[opportunity] to explain myself [in person]. Since people typically DON'T do that, I record [audio recordings],
and in some cases, [videos], of myself performing [oration], not unlike late comedian [George Carlin].

[George Carlin] was a famous comedian who was highly-skilled at [writing], [oration], and [philosophy], and was
rather poetic in how he came across to other people. One of his most famous quotes goes:
"*Never underestimate the power of stupid people in large groups.*"

They're words to live by.

```
                                                                              /----------/
                                                                             / Motivations
/------------------------------------------------------------------/--------/
\ Conversations /----------------------------------------------------------\
/--------------/
```

Failing to have a conversation with somebody about an [uncomfortable subject], is understandable.
But- at some point, the lack of comfortability has to be met with [realistic expectations].

So, if I avoid having an [uncomfortable conversation] with somebody about my life story, and instead write a [document] about it, and send it to the director of the library... She may take it out of context, and assume that the document is a [manifesto] or a [declaration of intent]...

But- does that give her and her staff the right to take my suggestion to install [solid state hard drives] into [all] of the computers in the [computer lab], and not give me a single shred of credit for that idea...?

Well, in their minds, [yes it (does/did)], and it's [pretty easy to prove that is EXACTLY what they did].

So, if I make the video critiquing the [IT (director/staff)] for going right ahead and installing the [solid state hard drives] less than (2) weeks after sending that document to the director...?

Apparently, that's worthy of an automatic (3) month ban.
That's why I was banned the first time.

Since that ban was served out, I went back to the library, and I just had this feeling lingering in the back of my mind, that maybe there might be an [additional ban] just for [looking] at somebody the wrong way, or [plugging an ethernet cable into an open port].

Yeah, so, on [07/18/2023], [Alexandra Gutelius] was recorded in this audio recording...

```
/------------|-------------------------------------------------------------------|----------\
\ Date       | Link                                                              | Duration /
/ 07/18/2023 | https://drive.google.com/file/d/1ANpAI9LO1ZzZKR-ZHXuPeMMtxiUUJ9dX | 00:13:57 \
\-----------------------------------------------------------------------------------------/
```

I did not specify that she was banning me for (3) months in the beginning of the recording. Neither did she.

However, she did state (3) months prior to when I began making the [audio recording].
Then, she changed her mind after I left, and expanded that ban to a full (6) months [just because she can].

The [second ban] was resultant to me being frustrated with the [wireless network] dropping out rather often.

Now, this happened sometimes when I managed [Computer Answers], and so I made a video back in [August 2017] that shows how to [power cycle networking equipment] like [servers], [routers], [switches], and [cable modems].

```
/------------|----------------------------|-----------------------------|----------\
\ Date       | Name                       | Link                        | Duration /
/ 08/16/2017 | Spectrum Cable Modem Reset | https://youtu.be/LfZW-s0BMow | 00:03:34 \
\-------------------------------------------------------------------------------/
```

Now, I could've given the [IT director] some advice on how to occasionally [power cycle] the access point so that it would not drop the connection as often as it did... but- that'd probably be difficult for a guy that only shows up for (5) hours a week, who may occasionally show up for about (5) days to fix a [printer issue].

I used to get paid to resolve a [simple printer issue] in an hour or less for [Intellinet] and various other businesses, so, taking (5) days to resolve a [printer low on ink] error was not an option...

But, we're talking about employees at a [public library] that is [funded by taxpayers] who pay for [salaries], [property tax], [maintenance], [landscapers], and [First Light fiber internet service]...

```
/--------------------------------------------------\

/ PS Prompt:\>                                     \
\--------------------------------------------------/
```

But, let's talk about [how many months I was actually using the ethernet port without being noticed].

Between [March 2023] and [July 2023], I would come to the library rather often with either (1) or (2) of my laptops to do my work as well as leisurely activities using the internet at the library on my devices.

When going to plug the power adapters into the wall, I noticed the [open ethernet port].

At no point whatsoever did anyone ever say "You're not allowed to use that port for any reason."

And even if it IS in the rules or [Internet Use Policy], it seems rather [draconian] to ban someone for (6) months for using it, especially after having already stolen that person's intellectual property to upgrade the computers to [solid state hard drives] all throughout the library.

[Allow me to explain my use of the ethernet port]. I would occasionally plug my laptop into that ethernet port, because the [wired connection] is [much faster] than the [wireless connection].

Since the [taxpayers] actually pay all of the bills at the library via a "*budget*", the [public] SHOULD have access to the [wired network] since it is exponentially faster than the [wireless one], even if the [wired network] they'd theoretically have access to, needed separation from the library's internal computer network.

That's what [VLANs], [Mac Address filtering], and authorization of an [ADDS DHCP server] are for.

It initially only worked whenever I had my smartphone plugged in to my device using [USB tethering], which means that I was still utilizing the [DNS server] on the [wireless network].

But after reviewing the connection details, I was able to determine the following network map after manually entering in the required information.

```
Application Development/Network Security /                                         Conversations
```

This is how to write [CSharp] code in [PowerShell].

```
\ Class HostNode
/ {
\     [UInt32]      $Index
\     [String] $IPAddress
\     [Object]       $Host
/     HostNode([UInt32]$Index,[String]$IpAddress)
\     {
/         $This.Index     = $Index
\         $This.IpAddress = $IpAddress
/     }
\     ResolveHostname()
/     {
\         $This.Host  = [System.Net.Dns]::Resolve($This.IpAddress)
/     }
\     [String] ToString()
/     {
\         Return $This.IpAddress
/     }
\ }
```

That information right there, is called a [class], it's a [format] in programming languages that allows multiple properties to be turned into an [object]. This is essentially [object oriented programming].

```
\ $List = 0..255 | % { [HostNode]::New($_,"10.106.1.$_") }
/
\ ForEach ($X in 0..255)
/ {
\     [Console]::WriteLine("Testing [$X]")
/     $Test = Test-Connection -ComputerName $List[$X].IpAddress -Count 1 -TimeToLive 100
\     If ($Test)
/     {
\         $List[$X].ResolveHostname()
/     }
\ }
/
\ $Table = $List | ? Host
```

Now, with this information, I can [execute this stuff] if I'm [connected to the network], and then the script will actually return what's known as a [network map]. A [network map] is a list of objects called [hosts] that are on a [particular network]. So, if I WAS a *nefarious douchebag* looking to screw over other people at the library, then first off, I wouldn't answer questions people ask me, like "*Can you help me with this…?*".

Secondly, collecting the [network map] would be a perfect way to do so.

Fortunately, the terminals all have [software restriction policies] on them, and [every users data is eliminated] at the [tail end] of [each session] when the computer [logs the user out], and [reboots itself] in order to [restore] the [clean virtual machine state information] that [DeepFreeze] utilizes.

I make a lot of videos where I'm providing [educational resources] in a productive manner, and I have also provided assistance to other patrons at the library (as stated above), because [many people would ask me questions] as if I actually [worked at the library]. The truth is, [I was spending more time at the library] than ANY of the staff.

But- it doesn't look like I'm going to get [PAID] for [any of that time], nor [any of the work I did].
If anything, it looks like someone's gonna [expedite any reason to ban me from the library again], even more.

```
/------------------------------------------------------------\
\ PS Prompt:\> $Table.Host                                   /
/                                                            \

/------------------------------------------------------------\
```

I hope that it goes without saying, that while I DO know how to circumvent [software restriction policies] and
software like [DeepFreeze], which is what the [CPH Library] uses on its' terminals that the public can use
(inside+outside) of the [computer lab] ...doesn't mean I'm gonna [teach] people how to do that.

So, allow me to turn this into a [lesson plan], similar to what I did in the document that I sent to the director back in [October 2022], where the [IT (director/staff)] took my idea to install the [solid state hard drives] into the computers at [my suggestion] in that document.

You COULD use various tools like [nmap] to get a readout of [all the devices on a particular network].

But, you COULD also use an [available ethernet port] that should be terminated at the (wall jack/patch panel), in order to [prevent someone with nefarious intent] from being able to get [this information].

You could also write [firewall entries] on either the [switch], the [server], the [gateway], or the [individual terminals], so that [everything is on the same network], and the computers belonging to the library would be protected from [any potential tomfoolery], yet still on the [same network] as [any potential visitor] plugging into the [wired network].

Having a policy such as "*attempting unauthorized entry to the library's computers or network or external networks*" is a policy that you would only need if you weren't really *that* skilled at [networking] or [security engineering]… …because if someone who *WAS* that skilled at it, had the position…

…then they would have the *necessary experience* to write a bunch of [firewall entries], (*like what can be seen in some of my videos*) or even use a [group policy] to [distribute security policies] to [every machine on the domain], and even if the most fierce veteran at [network penetration testing] came in, and did their dirty work…?

Uh, [Kerberos] is a pretty strong [network security encryption]… which is what [Active Directory Domain Services] uses, in addition to [NTLM].

That's actually a failure on the [IT director]'s part, considering how "*hardened*" those [security measures] are.

This code up above is something that I cobbled together in about (10) minutes, and allow me to be perfectly clear, this allows someone to be able to connect directly to the printers over the network, to initiate print jobs without having to pay for the pages being printed.

All you would need to do, is connect to the device by its' name, since it was returned in the DNS entries up above. Then, you can download the drivers and send print jobs directly to the printer. You can even do this from the [wireless network] too … but I'm not going to elaborate on how to do that.

These are [security vulnerabilties] that the [IT director] should have patched up, since it is supposedly his job to enforce the policy.

However, the [IT director] failed to adequately prevent someone from being able to ascertain this information, which means that if I wanted to take actions that were [malicious], I certainly could have.

```
/------------------------------------------------------------\
\ trantor.CPH.PUBLIC          {}              {10.106.1.13}  /
/ SOLARIA.CPH.PUBLIC          {}              {10.106.1.14}  \
\------------------------------------------------------------/
```

Those are the [DNS servers] that gave me this information with the [System.Net.Dns] class in the above class I wrote, called [HostNode].

[Trantor] is a reference to [Isaac Asimov]. [Solaria] is a little more cryptic, so I'm not sure. But— I sure as hell know what the [Death Star] is.

```
/------------------------------------------------------------\
\ DeathStar.cph.public        {}              {10.106.1.18}  /
/------------------------------------------------------------\
```

The [Death Star] is featured in the series of movies [Star Wars], by [George Lucas]. [Luke Skywalker] blows up the first [Death Star] in [Star Wars: A New Hope]. Then, [Lando Calrissian] and [Han Solo] they blow up another one in [Star Wars: Return of the Jedi].

I'm not entirely sure why a [computer] in the [library's network] go by these names, as they do nothing to indicate what type of computer they are, what they're doing, why they're [potentially evil], or whatever.

```
                                                    _____/
 _____/  Application Development/Network Security
  \ Internet Usage /-------------------------------------------------------------------\
   /-------------\
```

I used that port a number of times to upload videos to [YouTube], especially when the videos I would upload were anywhere between (5GB – 40GB).

In fact, ALL of these videos in this playlist …

```
/--------------|-----------------------------------------------------------\
\ Name         | Link                                                      /
/ Invoke-cimdb | https://www.youtube.com/playlist?list=PL9wYU0PVYkUfDjN2LFKYGFGR0p50ljwnp \
\--------------|-----------------------------------------------------------/
```

… I uploaded using the [wired connection at the library], in addition to [several others].

Allow me to explain [what sort of videos I upload to YouTube]…

```
/------------|----------------------------------------|---------------------------------|-------------\
\ Date       | Name                                   | Link                            | Duration    |
/ 08/31/2023 | 2023_0831-(First Amendment Auditing)   | https://youtu.be/Ybm59jVubK0    | 00:34:22    \
\------------|----------------------------------------|---------------------------------|-------------/
```

That's a video of me providing commentary to a [First Amendment Auditing] video by a guy on [YouTube] named
[Too Apree], where I explain (when/where) police officers wave their dicks around aimlessly and [assert their
authority] when they bully people around who are standing on [public property].

Not unlike being banned for (6) months for using an [ethernet port] on a [public library network] by the
director of the library.

That's just an off-shoot tangent to what I normally record and upload.

I was actually using the [wired connection] to perform [video editing], [programming], [graphical
user interface design], [journalism], [research], [development], and [security engineering] related
activities dealing with [virtualization].

Here are some of those videos featuring [virtualization]:

```

State of Affairs

Now, let's talk about the [latest video] that I recorded on [09/17/2023] ...

```
/------------|----------------------------------------|---------------------------------|-------------\
\ Date       | Name                                   | Link                            | Duration    |
/ 09/17/2023 | 2023_0917-(CPH Library)                | https://youtu.be/gR6TXz1S1XM    | 00:31:10    \
\------------|----------------------------------------|---------------------------------|-------------/
```

In this video, I specify [other videos] and [audio recordings] I have made, because like I said earlier in
the document, [people make a lot of assumptions] and they can be proven to be [incorrect lying douchebags]
by [making recordings] and [comparing records], and things of that nature.

Here's (2) videos about [William Moak], the guy who showed up at the library on [10/15/2022] to tell the
[director] about the video that I uploaded named [Intellectual Property Theft] ...

```
/------------|----------------------------------|--------------------------------|-------------\
\ Date       | Name                             | Link                           | Duration    /
| 10/15/2022 | Bill Moak Harassment (1)         | https://youtu.be/ASTldaBdef4   | 00:00:20    |
/ 07/04/2023 | Bill Moak Harassment (2)         | https://youtu.be/z47hflXTTuE   | 00:00:36    \
\------------|----------------------------------|--------------------------------|-------------/
```

In video (1), [William Moak] showed up to prove how [stupid] and [gay] he is. He doesn't realize, [I don't care].
In video (2), [William Moak] did basically the same thing, because AFTER I had left the [Stewarts] at
[1736 US-9, Clifton Park, NY 12065], [William Moak] decided to follow me after I left the store.

When he passed me, I decided to [whip out my smartphone] and [record this dude] because I could sense
that he felt like proving how [stupid] and [gay] he is, again.

I don't have anything against [stupid] or [gay] people, he just has to keep reminding me, and it's annoying.

And, like magic ... ? That's *EXACTLY* what this moron decided to go right ahead, and do.
He's done it before ... ? He will do it again, I am god damn certain of it.

It can be seen that he was looking right at me while driving his [Jeep Patriot], and made it APPEAR
as if he had the balls to run me over with his vehicle. I did mention this to the staff at [Stewarts],
but a manager by the name of [John] doesn't really give a shit about these videos.

I remain uncertain as to whether or not [Bill Dake] will give a shit, considering I've been doing
business at his stores for a long time, as well as having worked for the [Hearst Corporation] delivering
and collecting newspapers (to/from) his stores all throughout the [greater capital district].

I showed video (2) to [SCSO Samuel Speziale] on [07/04/2023], and I wanted to file charges against
[Bill Moak], because the man has done [numerous criminal things to me], including:

[+] [having his kids James and Harley Moak assault me numerous times]
[+] [attempting to assault me with an aluminum baseball bat on my property on 06/13/2020]

```
[+] [contacting CPS anonymously to report (3) days later, that I sexually molested my daughter]
[+] [stealing my equipment from my house]
[+] [harassing me on Facebook]
[+] [harassing me at the library]
[+] [harassing me at Stewarts, and along US-9]

[William Moak] decided to [steal] all of [my equipment] from [my fathers house]:

[+] [Dell PowerEdge R410 bladeserver]
[+] [Dell PowerConnect 24-port gigabit managed + unmanaged switch]
[+] [Dell Optiplex 780]
[+] [2x 17" Dell LCDs w/ VGA and DVI connectors]
[+] [Dual purpose USB 3.0 HDD (external/clone) bay]
[+] [2TB Western Digital HDD (purple label/surveillance)]
[+] [27" AOC 1080 monitor]
[+] [my sons Nintendo Switch]
```

Why...? [Because the man is fuckin' stupid], that's why.

So is my mother, [Fabienne Silvie Kivlen Cook], who committed [perjury] on [06/28/2022] when she wrote a statement to [NYSP Sara DeRusso] about how I had her in a headlock because she was assaulting me during an altercation that I recorded in audio, AND, informed the fucking NYSP about being on my [Google Drive account] prior to them making an unlawful arrest that day where I was [tased].

Yeah, that's why I say that [many police officers are pretty stupid].

I told the court appointed public defender [Michael Depresso] about this audio recording, as well as this dipshit judge [Joseph Fodera] numerous times at the many court appearances after the [unlawful arrest] was made.

I also told the (2) dipshit psychiatrists that [Joseph Fodera] sent me to at [Saratoga County Mental Health] on [02/23/2023], [Dr. Glosman] and [Dr. Gurbek], about the audio recording. They too... didn't give a shit.

The police are SUPPOSED to corroborate BOTH sides of a story, especially when there's an [audio recording] that would serve to contradict the statement that a person committing perjury, would have made.

I told the same investigator in the [audio recording] listed in the beginning of this document…
...[Investigator Jeffrey Brown]...
...in ANOTHER audio recording I made of him on [02/17/2023] at the [Saratoga County Head Sheriffs Office]…

```
/------------|------------------------------------------------------------------------\
\ Date       | Link                                                                   /
/ 02/17/2023 | https://drive.google.com/drive/u/3/folders/1rEhybeaRBSL3fKUVtlIW0k4qQ0KguaRu \
\------------|------------------------------------------------------------------------/
```

...that my mother lied to the police about what occurred on [06/28/2022] and they've done absolutely nothing about it. That's why I record stuff. I don't trust what people [say], as [actions speak louder than words].

If the [actions] that somebody takes contradict their [words], then the [words] are [fucking meaningless].

As for my mother, her greatest feat in life, was [filing for bankruptcy] and [dropping out of college].

Her greatest achievement when it comes to me, is [undermining her own son thousands of times] and writing off my accomplishments such as: [college degree], [certifications from Microsoft and CompTIA], being the [manager] at [Computer Answers] for over (3) years setting the highest sales record at the fucking place, in addition to the numerous videos I've recorded of [cyberattacks] being waged against my equipment.

Yeah. Whoops, I forgot, she used to be extremely skilled at [jigsaw puzzles], [playing Yahtzee], [horseshoes], and she is STILL extremely skilled at playing [pop-it] on [Pogo.com]. Occasionally, she might play [FreeCell].

```
                                                                          _____/
_____/ Internet Usage
\                                                            /----------------------------\
  Stupid Rules /--------------------------------------------/                            \
/-------------\
```

At the [Clifton Park Halfmoon Public Library], we are about as serious as they come.
We do not tolerate [tomfoolery] of any [kind], [sort], [type], [mode], or [otherwise], and as such...?

We have a [zero tolerance policy] for it…

Thus, here are some [stupid rules] that you have to abide by, if you want to experience time at OUR library…

You do not necessarily have to be a resident of the town of [Clifton Park/Halfmoon] in order to come into the library and do stuff...?

But, even if you:

- are a resident of [Clifton Park] or [Halfmoon]
- have been a [resident for many years]
- have [paid your taxes]
- have contributed [funding] to the [existence of this library] or its' [content] or [equipment]

...you absolutely MUST abide by our policy of [stupid rules] written below.

```
/------------------------------------------------------------------------------\
\ Things you're NOT allowed to do at the [Clifton Park Halfmoon Public Library] /
/==============================================================================\
\                                                                              /
/ [+] Think that ANY of these rules are [stupid]                               \
\ [+] Being friendly, courteous, or respectful to people on a daily basis (or at all…) /
/ [+] Saying "Good morning", or "Have a good night" to the [staff members], or [other people] \
\ [+] [Smiling], [giggling], [laughing], [coughing], [sneezing], or [passing gas] /
/ [+] Doing [constructive things] at the library                               \
\ [+] Using the [restroom] or the [elevators] more than (2) times per day      /
/ [+] Getting [water] from the [water fountain] more than (3) times per day    \
\ [+] Being at the library so often that the staff members ask why you're there so much /
/ [+] Eating (food/snacks), or drinking beverages of any kind, even if we have a vending machine… \
\     …and if you DO purchase stuff from the vending machine, you'll have to (go outside/climb into a den), /
/     and consume that product there                                           \
\ [+] Making [eye contact], or using ANY [body language] that [acknowledges someone's existence] /
/ [+] [Joking around] of any kind or sort                                      \
\ [+] [Sitting in a chair] (and/or) [minding your own god damn business]       /
/ [+] [Complimenting people] if they [look nice], or their hair, clothes, or whatever are delightful \
\ [+] Crying, frowning, or pouting for over (5) seconds                        /
/ [+] Being annoying, or looking offensive                                     \
\ [+] Having a fully grown beard, or ANY other type of visible body hair (falls under looking offensive…) /
/ [+] Trying to charm your way out of any trouble you may have found yourself in \
\ [+] Plugging in [USB thumb drives] to [access your own files] on [our terminals] (OR yours…) /
/ [+] Plugging in [your own network cable] into an [open ethernet port] that just so happened to be [unused] \
\ [+] [Using the printer] when it is [low on ink], or at all                   /
/ [+] Providing other library visitors [helpful advice], such as:              \
\     [-] how to log into their [email account]                                /
/     [-] how to access their [online banking]                                 \
\     [-] providing [educational resources] for [staff members in the IT department] /
/     [-] proving ANY general, all-around helpful citizenry                    \
\                                                                              /
/ [+] Offering cool ideas such as having a [virtual machine system] that doesn't haphazardly delete a users \
\     files during any session... because that would require a creative solution to pull off, even if that /
/     would make our library or visitors save resources like [time], [energy], [hardware], or [money]      \
\ [+] Using ANY library resources to sponsor:                                  /
/     [-] hate (crimes/speech)                                                 \
\     [-] calling police officers careless idiots                             /
/     [-] espionage                                                            \
\     [-] hacking (even if it's ethical hacking, buddy…)                       /
/     [-] terrorism                                                            \
\     [-] (state-sponsored/non state-sponsored) cybercrime                     /
/     [-] identity theft                                                       \
\     [-] journalism about [Edward Snowden], [Julien Assange], [climate change], or [other annoying stuff] /
/     [-] other general, all-around tomfoolery                                 \
\                                                                              /
/ [+] [Recording educational videos] of [any kind] in relation to:            \
\     [-] application development                                             /
/     [-] website development                                                 \
\     [-] graphic design                                                      /
/     [-] virtualization                                                      \
\     [-] network engineering                                                /
/     [-] programming                                                        \
\     [-] security engineering                                               /
/     [-] Active Directory Domain Services administration                    \
\     [-] security certificate distribution                                  /
/     [-] group policy implementation                                        \
\     [-] Kerberos ticketing system                                          /
/     [-] Anything like that (even if you're a Microsoft/CompTIA certified expert) \
\                                                                              /
/ [+] Printing off copies of your [resume] and leaving them with the [IT director], or whoever \
\ [+] [Breathing] above the maximum socially acceptable rate                   /
/ [+] Talking about your [life story], or whatever                             \
\ [+] (Being/looking) [annoying]                                               /
/ [+] Looking at anybody the wrong way                                         \
\ [+] Getting [upset] when the [director] decides to [ban you] for (3) months for [doing nothing] that /
/     [altered] or [damaged] any [computer] or [networking equipment] that the [public paid for] in a     \
\     [public building] that the [residents] of the [town] have [funded]       /
/     (that MAY include the recipient of a draconian (3) month ban)            \
\ [+] Addressing [any staff member] by their [first name], [last name], [full name], or [nickname] /
/ [+] Making up a [silly nickname] for [anybody] at the library, even if it's a friend \
\ [+] Questioning whether some of these rules [contradict] one another         /
/ [+] Thinking about how dumb ANY of these rules are, even if that was [already stated]... \
\                                                                              /
\==============================================================================/
                                                                    /‾‾‾‾‾‾‾‾‾‾‾‾‾\
                                                                   / Stupid Rules \
/‾‾‾‾‾‾‾‾‾‾‾‾‾‾‾==================================================================\
\ Conclusion /
/‾‾‾‾‾‾‾‾‾‾‾‾\

  If you do ANY of these things while at the [Clifton Park Halfmoon Public Library]...?
  You will be banned anywhere from (7) days, to (90) years.
```

(7) days if you're lucky enough to be an [innocent looking individual]...
(90) years if you're just the [worst person that ever lived].

No in between.
If you have somehow found yourself somewhere in between...?

That's [ban worthy].

If you think that (90) years is equivalent to a permanent ban, that is just your opinion...
[(90) years goes by pretty quickly], so, you really have no room to complain.

If you do not abide by ALL of these rules, you will be [immediately banned] for simply [existing].
If you think [any] of these rules are [stupid], [ridiculous], or [draconian], that is ALSO [ban worthy].

[Don't play games with us], and [we won't play games with you].
That's all there is to it, and there's [nothing dumb] about [any] of these [stupid rules].

Even if you don't come to the library, or you have no intention of coming here, or have simply never even heard
of our library, and you think ANY of the rules are stupid...?

We have [telepathic powers], as well as [access] to the [all-seeing eye]... and we will find out.
Then you will be [banished] for anywhere between (7) days, to (90) years.

This conversation is over. Bye.
